PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Analyzed architectural drawings and conducted site visits to prepare detailed **sales quotations** for renewable energy solutions, increasing quote accuracy by **15%**.
- Managed and expanded a **sales prospect list**, addressing technical queries via telephone and email to clearly articulate product advantages and secure new business.
- Performed **heat load calculations** for boilers, heat pumps, and radiators using building regulations and SEAI grant scheme requirements, ensuring optimal system sizing.
- Provided technical documentation and **data sheets** to onsite installation crews, facilitating accurate and compliant system installations.
- Coordinated project timelines with clients, installation crews, and other trades to schedule installations, ensuring material availability and adherence to project stages using a **Kanban board**.
- Managed inventory of materials entering and exiting the warehouse, allocating stock to specific jobs and tracking ordered goods to ensure timely delivery and minimize project delays.

SKILLS

Sales & Quoting – Sales Quotations, Site Visits, Prospect Management, Technical Sales, Follow-up

Technical Calculations – Heat Load Calculations, Domestic Ventilation System Sizing, Boiler Sizing, Radiator Sizing

Software & Tools – Microsoft Word, Microsoft Excel, Microsoft PowerPoint, SEAI DEAP Software, Power BI, Tableau, R/RStudio, Python, SQL, Jira, Confluence

Project Management – Project Coordination, Scheduling, Kanban Board, Material Allocation, Stock Management, Site Work

Customer Service & Support – Technical Support, Customer Queries, Troubleshooting, Maintenance, Repair, Data Entry

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Renewable Energy System Sizing & Quotation Platform

- Developed a Python-based tool to automate heat load calculations and system sizing for heat pumps and ventilation, reducing calculation time by **40%**.
- Integrated architectural drawing analysis into the tool, enabling automated measurement extraction for preparing comprehensive sales quotations.

- Built an interactive dashboard using **Power BI** to visualize project pipelines, track sales progress, and monitor key performance indicators for the sales team.

Logistics and Inventory Management System

- Designed and implemented a **SQL** database schema to track materials, manage warehouse stock levels, and allocate inventory to specific installation jobs.
- Created automated reports using **Python** and **Pandas** to generate stock level summaries and identify potential shortages, streamlining the ordering process.
- Developed a system for liaising with suppliers to manage damages, faults, and warranty issues, ensuring prompt resolutions and minimizing site downtime.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
