PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India 09/2021 – 01/2025 (3.5 Years)

- Analyzed large datasets to identify high-level data trends and patterns, translating findings into actionable recommendations for business stakeholders, improving decision-making accuracy by **15%**.
- Performed root cause analysis on data discrepancies and application issues, escalating critical findings to development teams for resolution and implementing preventative measures.
- Validated data quality and accuracy through rigorous web-based research and processing of business applications, reducing data error rates by **22%**.
- Developed and maintained **Power BI dashboards** and reports, integrating data from multiple sources to provide clear visualizations of key performance indicators and operational metrics.
- Collaborated with cross-functional teams to support software usability testing, providing detailed feedback on user interface and functionality to enhance the user experience.
- Managed and executed change control processes for system configuration updates and UAT coordination, ensuring seamless post-go-live support across interconnected enterprise systems.

SKILLS

Data Analysis & BI – Power BI, DAX, Power Query, Tableau, Data Modelling, Business Intelligence, Data Warehousing, Statistical Analysis, R, Python (pandas, NumPy, scikit-learn)

Databases & SQL – SQL, PostgreSQL, MySQL, Oracle, Database Systems

Programming & Scripting – Python, Java, Spring Boot, REST APIs, Shell Scripting

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Tools & Methodologies – Jira, Confluence, Agile/Scrum, Web Research, Web-Based Maps Applications, Spreadsheets, Linux

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin 02/2026

BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India 01/2021

PROJECTS

Operations KPI Dashboard for Financial Services

- Designed and implemented an interactive **Power BI dashboard** to monitor critical operational KPIs for a financial services client, consolidating data from transaction processing systems.
- Automated data extraction and transformation processes using **Power Query** and SQL, reducing manual reporting effort by **30%** and improving data timeliness.
- Developed complex **DAX measures** to derive key metrics for reconciliation workflows and transaction monitoring, enabling proactive identification of payment processing anomalies.

Data Validation and Trend Analysis Platform

- Developed a Python-based data validation framework to assess the quality of incoming business application data, identifying patterns and anomalies across large datasets.
- Integrated **web research capabilities** into the platform to cross-reference and validate external data points, enhancing overall data integrity by an estimated **20%**.
- Created automated reports and visualizations using **Python (pandas, Matplotlib)** to present identified data trends and root cause analysis findings to stakeholders.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
