PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India **09/2021 – 01/2025 (3.5 Years)**

- Assisted with the return to service of **AOG aircraft** by liaising with flight crew and engineers to diagnose and resolve technical defects, reducing average recovery time by **15%**.
- Facilitated the dispatch of the **Lear Jet** for urgent transport of engineers and critical spares to remote locations, directly contributing to faster **AOG recovery** and minimizing flight schedule disruptions.
- Reviewed and managed open **HILs (Hardware Integration Labs)** and ongoing maintenance forecasts, ensuring scheduled tasks were planned and executed to maintain fleet operational readiness.
- Provided critical visibility of fleet **AOG status** by updating and distributing technical issue reports to senior management and relevant engineering teams.
- Supported production environments with strict **SLAs and audit trails**, performing incident response and analysis for critical operational systems.
- Developed **Python scripts** for automation of data pipelines and scheduled reporting, improving data processing efficiency for operational dashboards by **20%**.

SKILLS

Aviation Maintenance – Aircraft On Ground (AOG) Recovery, Technical Defect Resolution, Maintenance Planning, Fleet Status Reporting, Spares Logistics

Engineering Support – Liaison with Flight Crew, Technical Defect Analysis, Operational Readiness, Incident Response, Production Support

Software & Scripting – Python, Java, Spring Boot, SQL, REST APIs, Docker

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Linux, Jenkins, Git

Data & Reporting – Power BI, DAX, Tableau, Power Query, Splunk, Dynatrace, Data Modelling

Business Systems – ERP Integration Support, Change Management, UAT Coordination, Confluence, Jira

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin **02/2026**

BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India **01/2021**

PROJECTS

Fleet Operations Monitoring Dashboard

- Developed a **Power BI** dashboard to visualize real-time fleet status, including aircraft availability, maintenance schedules, and critical technical issues.
- Integrated data from multiple sources using **Power Query**, transforming raw operational logs into actionable insights for maintenance control managers.

- Implemented **DAX measures** to calculate key performance indicators such as aircraft recovery times and planned vs. actual maintenance task completion rates.

AOG Recovery Automation Pipeline

- Designed and implemented a **Python**-based pipeline to automate the tracking and reporting of Aircraft On Ground (AOG) incidents.
- Integrated with internal ticketing systems via **REST APIs** to retrieve defect information and trigger alerts for urgent spare parts dispatch.
- Reduced manual data entry and reporting time for AOG recovery processes by **30%**, enhancing team responsiveness.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
