PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India 09/2021 – 01/2025 (3.5 Years)

- Developed and maintained **Python** backend services for a large-scale consumer platform, contributing to **80%** of the system's functionality and achieving **99.95%** uptime.
- Designed and managed **PostgreSQL** database schemas to support reliable data storage and retrieval for high-traffic web platform features, reducing data retrieval latency by **30%**.
- Wrote and optimized **SQL** queries for performance and scalability, improving the execution speed of critical reporting jobs by an average of **45%**.
- Built background processing jobs and automated workflows using **Python** to handle system tasks, decreasing manual intervention by **60%** and ensuring timely data synchronization.
- Created **REST APIs** and backend functionality to support user-facing features, enabling seamless integration with marketing and operations tools and accelerating feature deployment cycles by **20%**.
- Investigated and resolved production issues across cloud-hosted systems, implementing fixes that reduced recurring incidents by **25%** and maintained service level agreements.

SKILLS

Backend Development – Python, Java, Spring Boot, REST APIs, Flask, FastAPI

Databases – PostgreSQL, MySQL, Oracle, SQL, Data Warehousing

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, Linux

Data & Analytics – Power BI, Tableau, R, pandas, NumPy, scikit-learn, DAX, Power Query

AI Tools – AI-assisted development tools, coding assistants

Methodologies – Agile, Scrum, Change Management, Incident Response

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin 02/2026

BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India 01/2021

PROJECTS

Real-Time Transaction Monitoring System

- Developed a **Python**-based backend service to ingest and process high-volume financial transaction messages in near real-time.
- Designed and implemented a **PostgreSQL** schema to store transaction data and associated operational alerts, supporting audit trail requirements.
- Integrated with monitoring tools, providing dashboards that visualized transaction flow status and highlighted anomalies, reducing manual reconciliation time by **35%**.

Automated Data Pipeline for Business Reporting

- Engineered an automated data pipeline using **Python** and **SQL** to extract, transform, and load data from multiple enterprise systems into a central data warehouse.
- Built **REST APIs** to expose aggregated data for consumption by downstream reporting tools and business intelligence dashboards.
- Enhanced data quality and consistency across reports, leading to a **20%** improvement in data-driven decision-making for stakeholders.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
