PROJECTS

Real-Time Transaction Monitoring Dashboard

- Developed a **Power BI** dashboard to provide real-time operational insights into financial transaction flows, integrating data from multiple sources.
- Implemented automated alerting for anomalies and failures within transaction processing using **Python** scripting and scheduled jobs.

- Collaborated with business analysts to define KPIs and data requirements, ensuring the dashboard met critical operational needs and improved issue detection rates by **25%**.

Automated Production Incident Response System

- Built a **Python**-based automation tool to streamline the initial response to production incidents, correlating logs from **Splunk** and generating incident reports.
- Integrated the system with ticketing platforms like **Jira** to automate ticket creation and assignment for P1/P2 issues, reducing initial response time by an average of **10 minutes**.
- Enhanced system reliability by implementing health checks and automated recovery scripts for common issues on **AWS EC2** instances.
