PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India 09/2021 – 01/2025 (3.5 Years)

- Managed and enhanced **CI/CD pipelines** using **Jenkins** and **GitLab**, reducing deployment failures by **15%** through proactive monitoring and automated remediation.
- Developed and maintained **Python** scripts for automating ETL processes and scheduled reporting, improving data processing efficiency by **20%** for critical financial operations.
- Resolved production incidents and change requests within strict SLAs for enterprise applications, performing root-cause analysis and implementing long-term fixes to prevent recurrence.
- Designed and implemented **REST API** integrations between enterprise systems and a financial services dashboard, facilitating seamless data flow and improving cross-system visibility.
- Supported and integrated with enterprise business systems, including ERP modules, managing change control processes and coordinating UAT for system configuration updates.
- Created interactive **Power BI** dashboards and reports with complex **DAX** measures for business stakeholders, enhancing data-driven decision-making and providing actionable insights.

SKILLS

DevOps & CI/CD – Jenkins, GitLab, Docker, CI/CD pipelines, Deployment Orchestration

Programming & Scripting – Python, Bash, PowerShell, Java, Spring Boot

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Linux

Data & Analytics – Power BI, DAX, Power Query, Tableau, R, pandas, NumPy, scikit-learn, Data Warehousing, ETL

Databases – SQL, PostgreSQL, MySQL, Oracle

Orchestration & Workflow – Apache Airflow, Cron jobs

System Management – Splunk, Dynatrace, Jira, Confluence, Change Management, RBAC

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin 02/2026

BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India 01/2021

PROJECTS

Automated Transaction Reconciliation System

- Developed a **Python**-based ETL pipeline to automate the reconciliation of financial transaction data from multiple sources, reducing manual processing time by **30%**.
- Integrated with **PostgreSQL** databases to extract, transform, and load transaction records, ensuring data integrity and compliance with audit trail requirements.

- Built automated alerting mechanisms using **Flask** to notify operations teams of discrepancies identified during the reconciliation process, improving issue detection speed.

Real-Time Operations Monitoring Dashboard

- Engineered a **Java Spring Boot** microservice to aggregate real-time operational metrics from distributed systems, supporting a critical financial services dashboard.
- Implemented robust error handling and logging using **Splunk**, enabling faster diagnosis of production incidents and maintaining **99.9%** system uptime.
- Designed and deployed the service on **AWS EC2** instances within a containerized environment using **Docker**, ensuring scalability and reliability for high-volume transaction processing.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
