

HARIRAMAKRRISHNAN RAMACHANDRAN

+353 899706156 | hariramakrrish@gmail.com | [LinkedIn](#) | Stamp 1G — Eligible to work full-time in Ireland

PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and implemented **Python** scripts for automating ETL processes, reducing manual data transformation time by **40%** and improving data pipeline reliability.
- Developed and maintained **Java Spring Boot** REST APIs for enterprise applications, handling over **10,000** requests per minute during peak loads.
- Managed production support for enterprise applications, resolving P1/P2 incidents and maintaining service level agreements (SLAs) with **99.9%** uptime.
- Optimized **SQL** queries and database schemas across PostgreSQL and Oracle, accelerating critical reporting functions by up to **30%**.
- Engineered and deployed **AWS** infrastructure components including EC2 instances, S3 buckets, and Lambda functions to support scalable application deployments.
- Collaborated with cross-functional teams to integrate enterprise business systems, ensuring seamless data flow and supporting change-control management for system updates.

SKILLS

AI/ML – Model Serving, Inference Optimization, Kernel Optimization, Compute Shaders, Metal Shading Language (MSL), Low-Level Optimization, Performance Metrics, Latency Reduction, Throughput Improvement, Memory Footprint Reduction

Programming Languages – Python, Java, SQL, R, Bash

Frameworks & Libraries – Spring Boot, pandas, NumPy, scikit-learn, Flask, FastAPI

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, CI/CD

Databases – PostgreSQL, MySQL, Oracle

Data Visualization & BI – Power BI, DAX, Tableau, Power Query

Operating Systems – Linux

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

AI Inference Engine for Resource-Constrained Devices

- Developed a custom inference engine using **Metal Shading Language (MSL)** compute shaders to optimize model execution on edge devices.
- Implemented low-level kernel optimizations and performance monitoring, achieving a **25%** reduction in inference latency and a **15%** decrease in memory footprint.

- Engineered robust inference pipelines with comprehensive performance metrics tracking, including response latency, throughput, and memory consumption across diverse operational conditions.

Real-Time Transaction Monitoring Dashboard

- Built a **Power BI** dashboard to visualize real-time transaction flows and operational alerts for financial services clients, enhancing visibility into payment message statuses.
- Integrated data from multiple sources using **Power Query** and modeled complex DAX measures to provide actionable insights on reconciliation workflows and failed transactions.
- Supported production environments with strict audit trails and regulatory awareness, collaborating with business analysts to refine alerting mechanisms and improve system reliability.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
