PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India **09/2021 – 01/2025 (3.5 Years)**

- Designed and implemented new Java Spring Boot microservices for core digital financial services, enhancing system modularity and maintainability.
- Contributed to the full development lifecycle of scalable Java applications, including design, coding, testing, and deployment within an Agile Scrum framework.
- Participated actively in code reviews, providing constructive feedback to peers and junior developers to uphold high code quality standards and promote best practices.
- Managed production support for enterprise Java applications, resolving P1/P2 incidents within strict SLA targets and conducting root cause analysis for recurring issues.
- Automated data processing and reporting tasks using Python scripting, reducing manual effort by **40%** and improving data pipeline reliability for financial operations.
- Developed and optimized complex SQL queries across PostgreSQL and Oracle databases for data validation, reporting, and supporting cross-system integrations.

SKILLS

Languages – Java, Python, SQL, JavaScript, HTML, CSS.

Frameworks/Libraries – Spring Boot, Hibernate, Java EE, Spring.

Databases – MySQL, Oracle, MS SQL Server, PostgreSQL, MongoDB, DynamoDB, Cosmos DB.

Tools & Technologies – Git, Docker, Kubernetes, Jenkins, Splunk, Dynatrace, Jira, Confluence, AWS.

Methodologies – Agile, Scrum, Kanban, OOP, Design Patterns, Microservices.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin **02/2026**

BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India **01/2021**

PROJECTS

Payments Operations Dashboard Enhancement

- Developed RESTful APIs using Java Spring Boot to integrate real-time transaction data into a financial operations dashboard, improving visibility into payment flows.
- Automated reconciliation workflow checks using Python scripts, reducing manual reconciliation time by **30%** and identifying discrepancies faster.
- Collaborated with business analysts to refine operational alerting for failed transaction messages, ensuring timely notification and resolution for critical payment issues.

Scalable Microservice Architecture for FinTech

- Designed and built a suite of Java Spring Boot microservices for a new digital financial product, focusing on modularity and independent deployment.
- Containerized microservices using Docker for consistent development and deployment environments, integrating with Jenkins CI/CD pipelines.
- Implemented robust error handling and logging mechanisms across services, improving system observability and reducing mean time to resolution for production issues by **25%**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
