PROJECTS

AI-Augmented Code Generation Pipeline

- Developed a CI/CD pipeline that integrates **GitHub Copilot** and custom agent scripts to auto-generate boilerplate code and unit tests for new microservices.
- Implemented automated documentation generation using AI, reducing manual documentation effort by **40%** and ensuring consistency across services.

- Deployed the pipeline using **Jenkins** and **Docker**, enabling rapid prototyping and efficient feature development for cloud SaaS applications.

Real-Time Operations Monitoring Dashboard

- Engineered a real-time dashboard using **Power BI** to visualize transaction flows and operational alerts for a financial services client, enhancing monitoring capabilities.
- Developed **SQL** queries and data models to aggregate data from multiple sources, supporting reconciliation workflows and reducing manual data compilation time by **50%**.
- Collaborated with business analysts to define key performance indicators and ensure compliance with regulatory awareness requirements for production environments.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
