PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and implemented **event-driven data pipelines** using **Java Spring Boot** and **Kafka** equivalents for a financial-services operations dashboard, processing over 1 million transactions daily with 99.95% uptime.
- Developed **Python scripts** to automate data validation and ETL processes, reducing manual data preparation time for enterprise business systems by **40%**.
- Constructed **canonical domain models** and 'golden sources' for core banking entities including accounts, transactions, and ledger entries, ensuring data accuracy and auditability.
- Implemented **data quality rules** and automated monitoring for critical financial datasets, achieving a **98%** reduction in data integrity incidents.
- Managed **change-control processes** for ERP system configurations and cross-system integrations, coordinating UAT and post-go-live support to minimize business disruption.
- Built and operated **scalable data infrastructure** on **AWS**, incorporating **Docker** containers and CI/CD pipelines via **Jenkins**, improving deployment frequency by **30%**.

SKILLS

Core Banking & Data Engineering – Ledger Data Modelling, Transaction Data Modelling, Accounts, Balances, Postings, Interest, Fees, Lifecycle Events, Double-Entry Ledger, Reconciliation, Idempotency, Data Lineage, Audit Trails

Data Ingestion & Streaming – Event-Driven Pipelines, Kafka, CDC, Micro-batching, Pub/Sub, Batch Processing, Streaming Processing, Error Handling, Replay Strategies, Backfill Strategies

Cloud & Infrastructure – AWS, EC2, S3, Lambda, CloudWatch, Docker, Kubernetes, Terraform, Data Infrastructure, Orchestration, Metadata Management

Databases & SQL – SQL, PostgreSQL, MySQL, Oracle, Data Warehousing, ETL, Data Quality, Data Contracts, Schema Evolution

Programming & Scripting – Java, Spring Boot, Python, R, REST APIs, Shell Scripting, DAX, Power Query

Observability & Operations – Splunk, Dynatrace, Logging, Metrics, Tracing, Pipeline SLOs/SLIs, Runbooks, Operational Dashboards, Incident Response, Root-Cause Analysis

BI & Analytics – Power BI, Tableau, Data Modelling, Business Intelligence, Exploratory Data Analysis, Statistical Methods

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Real-Time Payments Reconciliation Engine

- Developed a **Java Spring Boot microservice** to ingest and process high-volume payment messages, performing real-time reconciliation against ledger entries.
- Implemented **idempotent ingestion patterns** and robust error handling to ensure accurate transaction processing and prevent data duplication in a 99.99% available system.
- Integrated with **PostgreSQL** for storing transaction states and reconciliation logs, enabling detailed audit trails and operational monitoring dashboards.

Financial Operations Dashboard & Alerting System

- Designed and built an interactive dashboard using **Power BI** to visualize key performance indicators for a payments operations team, including transaction success rates and failure analysis.
- Created complex **DAX measures** and data models to aggregate and analyze operational data, providing stakeholders with actionable insights and reducing report generation time by **50%**.
- Automated data extraction and transformation using **Power Query** and scheduled Python scripts, ensuring timely updates to the dashboard and supporting regulatory reporting requirements.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
