PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Investigated and resolved production issues by analyzing **Splunk** logs and correlating events across **Java** services, reducing mean time to resolution by **18%**.
- Implemented targeted code fixes for identified bugs in **Angular** front-end components and **Java Spring Boot** back-end APIs, ensuring adherence to code review standards and comprehensive test coverage.
- Developed Python automation scripts to streamline log aggregation and diagnostic checks, decreasing manual investigation effort for common production issues by **30%**.
- Maintained and enhanced internal tooling for production support, including a diagnostic dashboard that correlated metrics from **AWS CloudWatch** and **Dynatrace**, improving team efficiency.
- Authored detailed post-incident summaries and debugging playbooks for recurring production issues, contributing to a knowledge base that reduced repeat incidents by **15%**.
- Collaborated with cross-functional teams to gather requirements for operational tooling enhancements and supported User Acceptance Testing (UAT) for system configuration updates.

SKILLS

Languages – Java, Python, SQL, Angular

Frameworks/Libraries – Spring Boot, pandas, NumPy, scikit-learn

Cloud/Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux

Databases – PostgreSQL, MySQL, Oracle

Observability/Monitoring – Splunk, Dynatrace, CloudWatch

DevOps/CI/CD – Jenkins, Git, Jira, Confluence

Data Analysis/BI – Power BI, Tableau, DAX, Power Query, R, RStudio

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Production Incident Triage & Resolution Dashboard

- Developed a centralized dashboard using **Python** and Flask to aggregate alerts and logs from **Splunk** and **AWS CloudWatch** for a financial-services client's payments operations.
- Implemented real-time monitoring of transaction flows and automated alerting for failed payment messages, contributing to a **99.9%** uptime for critical operations.

- Integrated with backend **Java Spring Boot** services to provide direct links to relevant log streams and system metrics within the dashboard for faster root cause analysis.

Automated Data Pipeline for Operational Reporting

- Engineered an automated data pipeline using **Python** and **pandas** to extract, transform, and load data from disparate sources into a PostgreSQL data warehouse.
- Created interactive reports and visualizations in **Power BI**, enabling business stakeholders to monitor key performance indicators and operational efficiency metrics, leading to a **20%** improvement in data-driven decision-making.
- Scheduled and managed ETL jobs using **Jenkins**, ensuring data freshness and reliability for daily operational reporting and reconciliation workflows.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
