PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed, implemented, and maintained **CI/CD pipelines** using **Jenkins** and **Git** across enterprise Java/.NET applications, reducing deployment cycle time by **40%** and enabling **20+ daily releases** with zero regression incidents.
- Built and managed **cloud-native infrastructure** on **AWS (EC2, S3, Lambda, CloudWatch)** using **infrastructure-as-code principles**, provisioning scalable environments that supported **3 concurrent development teams** and reduced infrastructure setup time from **2 weeks to 2 days**.
- Deployed and operated **containerised workloads** using **Docker**, establishing reproducible development and production environments with documented runbooks and version-controlled container registries, improving environment consistency across **15+ microservices**.
- Implemented comprehensive **monitoring, logging, and distributed tracing** using **Splunk, CloudWatch, and Dynatrace**, defining health check frameworks and SLA-driven alerting that reduced mean-time-to-resolution (MTTR) for P1/P2 incidents by **35%**.
- Embedded **DevSecOps practices** into the engineering lifecycle through **secrets management, dependency vulnerability scanning**, and threat modelling reviews, achieving **100% compliance** with Accenture security policies and regulatory requirements (GDPR, audit trails).
- Automated infrastructure provisioning and CI/CD orchestration using **Python scripting** and **shell automation**, building ETL workflows and scheduled reporting systems that eliminated **25+ hours/month** of manual operational toil and improved deployment repeatability.

SKILLS

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), infrastructure-as-code principles, cloud provisioning, networking fundamentals, distributed systems.

CI/CD & DevOps – Jenkins, Git, GitLab CI, Azure DevOps, containerisation, Docker, pipeline automation, version control, deployment automation, build systems.

Monitoring & Observability – Splunk, CloudWatch, Dynatrace, health checks, distributed tracing, logging frameworks, SLA management, incident response.

Programming & Scripting – Python, Java, SQL (PostgreSQL, MySQL, Oracle), shell scripting, REST APIs, Linux, cron jobs, automation.

DevSecOps & Compliance – secrets management, vulnerability scanning, dependency management, threat modelling, GDPR, regulatory compliance, secure-by-design engineering, firewall configuration, VPN management, OSI layer security.

Data & Analytics – Power BI, Tableau, data pipelines, ETL, pandas, NumPy, scikit-learn, Power Query, data modelling, reporting.

Domain Expertise – payments processing, SWIFT messaging (MT/MX), ISO 20022 message flows, SEPA, cross-border payments, banking operations, ERP integration, change-control management, agile/Scrum.

EDUCATION AND TRAINING

PROJECTS

Enterprise Payments Operations Dashboard & CI/CD Infrastructure (HCL Technologies)

- Architected and maintained **Jenkins-based CI/CD pipelines** supporting production deployment of a **SWIFT messaging/payments-operations dashboard** serving a banking client; implemented **Git branching strategies** and automated code review workflows that enforced **100% test coverage** and zero production defects.
- Deployed containerised application stack using **Docker** across **AWS EC2 and Lambda**, configuring **CloudWatch monitoring** and **Dynatrace distributed tracing** to provide real-time visibility into **ISO 20022 message flows**, transaction processing, and payment-operations workflows with **99.95% uptime SLA**.
- Implemented end-to-end **DevSecOps practices** including **secrets management** for API credentials, **vulnerability scanning** in build pipelines, and **firewall/VPN configuration** for secure network access across payment-processing systems, achieving **100% GDPR and regulatory audit compliance**.
- Designed automated **infrastructure provisioning** and **health-check frameworks** using **Python scripting** and **Linux shell automation**, reducing manual P1/P2 incident response time by **45%** through proactive alerting and self-healing recovery workflows.

Ireland Jobs Tracker – AI-Driven Resume Automation & CI/CD Deployment (Personal Project)

- Built end-to-end **CI/CD pipeline automation** using **GitHub Actions** for continuous integration and **Vercel deployment**, orchestrating data ingestion → AI processing → artifact generation → production release with zero-touch automation.
- Engineered **Python-based ETL and data pipeline** integration with **Apify scrapers** and **Claude API (Anthropic)**, implementing structured-JSON prompt engineering and constraint guardrails to generate **JD-tailored resume content at scale**.
- Implemented **PDF artifact generation** using **reportlab** and automated deployment workflows, demonstrating proficiency with **automation, API orchestration, and DevOps tooling** in a real-world AI/ML application context.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
