PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Directed delivery of **12+ concurrent enterprise infrastructure projects** across banking and financial services, managing **€2.5M+ portfolio value** with zero margin erosion and 100% on-time, on-budget completion through rigorous **risk identification and mitigation strategies**.
- Supervised and mentored **6+ project managers** and cross-functional engineering teams across SWIFT payments operations and ERP integration programs, exercising decision-making authority to guide technical teams in implementing effective risk controls and contractual claim mitigation.
- Managed complex client engagements involving **Risk Triggering Factors (RTFs)** including regulatory compliance (GDPR, PSD2, ISO 20022), change-control protocols, and multi-system integrations; delivered **15+ major system updates** with zero post-implementation write-downs.
- Drove revenue growth and repeat business by delivering **consistent, high-quality project execution** across mission-critical production environments; achieved **98% client satisfaction rating** and secured **3 contract renewals** through proactive stakeholder engagement and operational excellence.
- Built end-to-end **operational dashboards and KPI reporting frameworks** using **Power BI and Tableau** to track project margins, SLA compliance, and financial performance across portfolio; enabled data-driven decision-making that improved cost visibility by **40%** and accelerated margin forecasting.
- Engineered **Python-based data pipelines and ETL workflows** to aggregate project telemetry, financial data, and incident metrics from **PostgreSQL, Oracle, and AWS CloudWatch**; automated monthly financial reporting, reducing manual reconciliation effort by **60%** and improving audit trail transparency for regulatory compliance.

SKILLS

Project Management & Infrastructure – Project lifecycle management (concept through commissioning), Risk Triggering Factors (RTFs), multi-project portfolio oversight, client engagement leadership, team mentoring and supervision, change-control management, contractual claims mitigation, financial margin management.

Data Centers & Buildings Domain – Data center project delivery, colocation facility operations, mission-critical infrastructure reliability, technical project requirements analysis, complex client engagements, high-value project execution, operational efficiency optimization.

Data & Analytics – Power BI dashboards and DAX measures, Tableau interactive dashboards, data modelling and warehousing, ETL and data pipeline development, KPI reporting frameworks, financial analytics, operational reporting.

Software & Integration Engineering – Python scripting and automation, SQL (PostgreSQL, Oracle, MySQL), REST APIs, system integrations, ERP platform support, cross-system data flows, Docker containerization, AWS (EC2, S3, Lambda, CloudWatch).

Regulatory, Compliance & Domain Knowledge – GDPR and data protection, PSD2 and Open Banking compliance, ISO 20022 message flows, SEPA and cross-border payments, SWIFT messaging (MT/MX) standards, audit trail management, SLA governance, production environment controls.

Tools & Platforms – Jira, Confluence, Jenkins CI/CD pipelines, Git version control, Linux, Splunk, Dynatrace, GitHub Actions, Power Query, pandas, NumPy, scikit-learn.

Professional Development – MSc in Data Analytics (National College of Ireland), Bachelor of Engineering in Computer Science, postgraduate-level technical foundation, IELTS Academic Band 7/9.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin	02/2026
BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India	01/2021

PROJECTS

Mission-Critical Payments Operations Dashboard & Portfolio Management (HCL Technologies, 2022–2025)

- Led end-to-end delivery of **SWIFT messaging and payments-operations dashboard** serving **Tier-1 banking client** across full project lifecycle—concept, design, procurement, construction (infrastructure), and commissioning—ensuring **zero downtime, 99.99% SLA compliance**, and regulatory readiness for **ISO 20022 message flows, SEPA instant payments, and cross-border payment workflows**.
- Directed **4 project managers** and engineering teams managing concurrent **Risk Triggering Factors** including GDPR compliance, PSD2 open banking requirements, and audit trail implementation; proactively identified and mitigated **18 contractual risks**, preventing **€800K+ in potential claims** and ensuring 100% margin protection.
- Engineered **Power BI and Tableau operational dashboards** aggregating real-time transaction flow visibility, payment message alerts, and SLA metrics across production systems; delivered **monthly financial performance reports** tracking **€2.5M+ project portfolio margin**, improving forecasting accuracy by **45%** and enabling data-driven cost controls.
- Automated **ETL pipelines and Python data workflows** to consolidate incident logs, transaction reconciliation data, and compliance artifacts from **PostgreSQL and Oracle databases**; reduced manual reporting effort by **55%** and strengthened regulatory audit trail transparency for GDPR and financial controls.

Enterprise ERP Integration & Cross-System Infrastructure Program (HCL Technologies, 2023–2025)

- Managed delivery of **multi-phase ERP system integration and change-control program** supporting banking client's **operational infrastructure modernization**; coordinated **8+ interconnected systems** (ERP modules, business platforms, payment systems) across **15 major configuration updates** with zero post-go-live write-downs and 98% first-pass UAT success rate.
- Supervised cross-functional teams spanning **business analysis, infrastructure engineering, and operations** to translate complex client requirements into technical delivery roadmaps; led **change-management and impact assessment protocols** that reduced deployment risk by **65%** and ensured seamless post-implementation support for **500+ end-users**.
- Built **Python automation scripts and SQL data validation workflows** to verify system integration integrity across **REST APIs and database-level data flows**; implemented **Splunk and CloudWatch monitoring dashboards** for real-time infrastructure health and incident alerting, achieving **35% faster incident resolution** and improved operational SLA compliance.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)

- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
