PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Architected and deployed **end-to-end software solutions** using **Java Spring Boot, Python, and REST APIs** on **AWS infrastructure** (EC2, S3, Lambda, CloudWatch), managing **design, testing, deployment and operating** across the full software development life cycle for enterprise applications serving 500K+ daily transactions with **99.95% uptime SLA**.
- Led **architecture decisions** and **design reviews** for **automation tooling** and **infrastructure platform improvements**, collaborating cross-functionally with network engineers, system engineers, and operations teams to establish technical direction and deliver **software ecosystem mechanisms** enabling **Zero Touch scale/plan/operate** workflows, reducing manual operational overhead by **60%**.
- Established **day-to-day development activities management** through **CI/CD pipeline orchestration** (Jenkins), **code review governance**, and **Git branching strategies**, while mentoring junior engineers on system design patterns and **production support** best practices, enabling team velocity increase of **40%** quarter-over-quarter.
- Built **operational dashboards** and **automated monitoring systems** using **Splunk, Dynatrace, and CloudWatch** for real-time **network device lifecycle management**, enabling **P1/P2 incident response** within SLA targets and providing **tooling and systems** for **end-to-end automation** of infrastructure operations with **sub-second alerting latency**.
- Engineered **data pipelines** and **ETL automation** using **Python, SQL** (PostgreSQL, MySQL, Oracle), and **AWS Lambda** to consolidate network operations data from 15+ infrastructure platforms, enabling **intelligent automation** decisions across **all core networking space** and reducing **data processing time by 75%**.
- Drove **change-control management** and **infrastructure platform modernization** initiatives, conducting **UAT coordination**, design walkthroughs, and post-implementation triage across interconnected systems; fostered **inclusive team culture** through documentation, knowledge-sharing, and **bold ideas** empowerment in a **hyper-growth environment** supporting 100+ engineers.

SKILLS

Software Engineering & Architecture – Java Spring Boot, Python, REST APIs, system design, end-to-end ownership, design reviews, code review, architecture decisions.

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker containerization, Linux, shell scripting, infrastructure platform tooling.

DevOps & Operations – CI/CD (Jenkins), Git, automation tooling, production support, incident response (P1/P2), SLA management, monitoring systems, Splunk, Dynatrace, operational dashboards.

Data Engineering & Analytics – Python (pandas, NumPy, scikit-learn), SQL (PostgreSQL, MySQL, Oracle), ETL pipelines, data warehousing, Power BI, Tableau, data modelling, DAX.

Team Leadership & Culture – mentoring junior engineers, design leadership, cross-functional collaboration, team culture, documentation, knowledge sharing.

Process & Compliance – Agile/Scrum, change-control management, UAT coordination, Jira, Confluence, hyper-growth environments.

EDUCATION AND TRAINING

PROJECTS

Network Automation Intelligence Platform – Zero Touch Operations Engine (HCL Technologies)

- Designed and deployed a **unified software ecosystem** consolidating 20+ operational tools, procedures, and automation frameworks into a single **scalable, automated entity** serving AWS network infrastructure planning, scaling, and operations across 50+ data centers globally.
- Implemented **machine learning-driven network device lifecycle automation** using **Python, scikit-learn**, and **real-time data pipelines** (AWS Lambda, S3) to ingest operational metrics from **infrastructure platforms**, enabling **Zero Touch scale/plan/operate** with **92% prediction accuracy** for proactive network remediation.
- Built **operational dashboards** in **Power BI** and **Splunk** integrating **CloudWatch** metrics, **Dynatrace** traces, and custom **REST API aggregation** layers to provide **end-to-end visibility** into network automation workflows, enabling **sub-second alerting** and reducing **mean-time-to-detect incidents by 68%**.
- Established **CI/CD automation** using **Jenkins, Git**, and containerized **Docker** deployments across multi-region AWS infrastructure, supporting **hyper-growth scaling** with **zero-downtime releases** and enabling 50+ engineers to ship **infrastructure tooling and systems** weekly without impacting live network operations.
- Led **architecture reviews** and **design governance** for system integrations across legacy infrastructure platforms and cloud-native components, mentoring 12 junior engineers on **design patterns, production support** strategies, and **bold ideas** within an inclusive, high-velocity environment; delivered **40% reduction in operational toil YoY**.

SWIFT Network Intelligence Dashboard & Payments Operations Automation (HCL Technologies)

- Delivered **end-to-end software solution** for real-time payment message visibility using **Java Spring Boot** REST APIs and **SQL** (Oracle, PostgreSQL) to process 2M+ daily **SWIFT message flows** (MT/MX formats) with **99.98% uptime SLA**, enabling operations teams to monitor, route, and automate **cross-border payments**, SEPA instant payments, and reconciliation workflows.
- Engineered **production support systems** using **Splunk** and **CloudWatch** to provide **P1/P2 incident response** automation for mission-critical payment infrastructure; reduced **mean-time-to-resolution by 45%** through **design** of automated escalation workflows and **operational dashboards** surfacing ISO 20022 compliance metrics and transaction flow integrity.
- Implemented **automation tooling** and **data pipeline infrastructure** using **Python, AWS Lambda**, and **Jenkins CI/CD** to enforce **change-control management** for system configuration updates, coordinate **UAT** across interconnected banking platforms, and enable post-go-live support with audit trails compliant with **GDPR** data protection and regulatory requirements.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
