PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Triaged and resolved hardware, software, networking, and account issues across **macOS, ChromeOS, iOS, and Android** endpoints in a fast-paced enterprise environment, reducing mean time to resolution by **35%** through systematic troubleshooting and escalation management via ticketing systems, **Slack**, and in-person support.
- Administered and troubleshot **Google Workspace, Slack workspace management, GitHub**, and **Atlassian** SaaS platforms, supporting employee lifecycle workflows including onboarding, offboarding, and reorganizations across **200+ users** with zero critical access-control incidents.
- Implemented **identity and access management** solutions including **SSO, MFA, and directory services** integration, supporting **MDM fundamentals** and endpoint management policy enforcement across device enrollment and configuration profiles, reducing provisioning time by **40%**.
- Developed **Bash and Python automation scripts** to eliminate repetitive operational tasks, including device enrollment workflows, user provisioning pipelines, and knowledge base synchronization, automating **~20 hours/week** of manual IT operations work.
- Authored and maintained comprehensive internal documentation including runbooks, troubleshooting guides, and knowledge base articles; identified patterns in support request data and surfaced **8 systemic improvement opportunities** that reduced recurring issue volume by **30%**.
- Participated in on-call rotation for urgent out-of-hours support issues; handled escalations requiring cross-team coordination between IT Engineering, Security, and end-users; provided hands-on technical support for conference room AV systems, printers, and user technology infrastructure.

SKILLS

Endpoint & Device Management – macOS support & troubleshooting, ChromeOS administration, iOS & Android device management, MDM fundamentals, device enrollment, configuration profiles, policy enforcement.

SaaS & Cloud Administration – Google Workspace administration, Slack workspace management & permissions, GitHub administration, Atlassian tools (Jira, Confluence) support and troubleshooting.

Identity & Access Management – SSO configuration, MFA deployment, directory services integration, access control workflows, employee lifecycle management (onboarding/offboarding).

IT Support & Ticketing – Hardware & software troubleshooting, networking diagnostics, account management, user support across all technical levels, ticketing system administration, escalation management.

Automation & Scripting – Bash scripting, Python automation, operational scripting for device provisioning, user workflows, and repetitive task elimination.

IT Documentation & Communication – Runbook development, knowledge base articles, internal how-to guides, user guides for non-technical audiences, pattern recognition in support data.

Core Technologies – Linux, Git, REST APIs, databases (PostgreSQL, MySQL, Oracle), Docker, AWS (EC2, S3, Lambda), Jenkins CI/CD, Jira, Confluence.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

PROJECTS

Enterprise Endpoint Onboarding & Device Management Automation Platform (HCL Technologies)

- Designed and deployed a **Python & Bash-driven device provisioning automation system** that orchestrated **macOS, ChromeOS, iOS, and Android** enrollment, configuration profile deployment, and **MDM policy enforcement** at scale, reducing per-device onboarding time from **4 hours to 30 minutes**.
- Integrated **Google Workspace, Slack, GitHub, and Atlassian** identity provisioning with **SSO and MFA** workflows, eliminating manual account creation bottlenecks and reducing employee time-to-productivity by **60%** during high-volume hiring periods (onboarding **50+ employees/quarter**).
- Built comprehensive runbooks and knowledge base articles documenting endpoint troubleshooting, SaaS platform administration, and access management procedures, reducing support ticket resolution time by **25%** and enabling self-service resolution for **35% of recurring issues**.
- Implemented **escalation workflows and cross-team coordination protocols** between IT Engineering, Security, and operations, establishing SLA targets for critical hardware/software/networking issues and achieving **98% on-time resolution rate**.
- Conducted pattern analysis on **200+ monthly support tickets**, identified **6 systemic failure points** in device provisioning and access workflows, and led remediation efforts that eliminated recurring issues entirely, reducing total support volume by **28%** within 6 months.

User Support Escalation & Issue Pattern Analytics Dashboard (HCL Technologies)

- Analyzed **12 months of ticketing system data** to surface recurring support patterns across hardware, software, networking, and account management categories, identifying **8 high-impact automation opportunities** that reduced mean time to resolution by **35%**.
- Created internal documentation mapping escalation pathways, troubleshooting decision trees, and SaaS platform-specific procedures (**Google Workspace, Slack, GitHub, Atlassian**), enabling consistent handling of complex cross-team coordination issues and reducing escalation resolution time by **40%**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
