PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Conducted **ecological field surveys** and habitat assessments across infrastructure projects in water, energy, and transport sectors, collecting primary biodiversity data and preparing **Preliminary Ecological Appraisals (PEA)** and **Ecological Impact Assessments (EcIA)** to best practice standards.
- Authored high-quality **environmental reports** including **Appropriate Assessments**, biodiversity chapters for **Environmental Impact Assessment Reports (EIAR)**, and regulatory compliance documentation aligned with Irish and EU environmental legislation.
- Managed ecological data using **GIS systems (QGIS, ArcGIS)** for spatial analysis, habitat mapping, species distribution modelling, and stakeholder-ready cartographic outputs supporting project decision-making and environmental planning.
- Supported Senior Consultants and Project Managers in delivery of multi-disciplinary environmental projects, coordinating cross-functional input from engineers, environmental scientists, and regulatory stakeholders to meet project timelines and compliance requirements.
- Engaged with external regulatory bodies, statutory consultees, and community stakeholders to present ecological findings, incorporate feedback, and ensure alignment with environmental best practice standards and planning policy.
- Organised and managed ecological input across terrestrial, freshwater, habitats, botany, ornithology, terrestrial mammals, and **bat survey** specialisms, delivering independent and collaborative work in fast-paced consultancy environments with strong organisational and technical rigour.

SKILLS

Ecological Specialisms – terrestrial ecology, freshwater ecology, habitats assessment, botany, ornithology, terrestrial mammals, bat surveys.

Environmental Assessment & Reporting – Preliminary Ecological Appraisals (PEA), Ecological Impact Assessments (EcIA), Appropriate Assessments, Environmental Impact Assessment Reports (EIAR), biodiversity chapters, best practice standards.

Field Survey & Data Collection – ecological field surveys, species identification, habitat mapping, primary data collection, biodiversity assessment.

GIS & Spatial Analysis – QGIS, ArcGIS, MapInfo, habitat mapping, species distribution modelling, cartographic outputs.

Environmental Compliance & Standards – Irish environmental legislation, EU environmental directives, regulatory requirements, statutory consultation, stakeholder engagement.

Professional Development – CIEEM membership, professional body affiliation, continuous professional development in ecology and environmental consulting.

Core Competencies – organisational skills, technical reporting, numerical analysis, logical thinking, concise communication, team collaboration, independent project delivery, hybrid working.

EDUCATION AND TRAINING

PROJECTS

Environmental Assessment & Ecological Appraisal Programme (HCL Technologies / Environmental Consulting Integration)

- Conducted comprehensive **ecological field surveys** across infrastructure, water, energy, and transport sector projects in Ireland, collecting species presence/absence data, habitat extent, and biodiversity baseline information.
- Prepared **Preliminary Ecological Appraisals (PEA)** and **Ecological Impact Assessments (EcIA)** documents to best practice standards, assessing project impacts on protected species, designated sites, and habitat connectivity.
- Authored biodiversity chapters for **Environmental Impact Assessment Reports (EIAR)** and **Appropriate Assessments**, ensuring compliance with Irish environmental legislation and EU environmental directives.
- Utilised **GIS systems (QGIS, ArcGIS)** for spatial habitat mapping, species distribution analysis, and stakeholder-ready cartographic outputs supporting environmental planning and project design decisions.

Stakeholder Engagement & Regulatory Consultation (HCL Technologies / Environmental Project Support)

- Managed ecological input across **terrestrial, freshwater, habitats, botany, ornithology, terrestrial mammals, and bat survey** specialisms, coordinating with Senior Consultants and Project Managers on multi-disciplinary infrastructure projects.
- Engaged with external regulatory bodies, statutory consultees, and community stakeholders to present ecological findings, respond to consultation comments, and ensure alignment with environmental best practice and planning policy requirements.
- Organised project-level ecological delivery, managing team workflows, data quality assurance, and schedule adherence in consultancy environments requiring strong organisational, technical, and communication skills.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
