PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Developed and maintained **REST APIs** and **GraphQL** endpoints using **Java Spring Boot** and **Python (FastAPI)** to enable real-time data access across enterprise systems, reducing API response latency by **40%** and supporting **500+** daily requests in production environments.
- Built **automated testing frameworks (JUnit, pytest)** and **CI/CD pipelines** using **Jenkins** and **GitHub** to enforce code quality and reliability, achieving **85%** test coverage and reducing production defects by **60%** across deployment cycles.
- Deployed and monitored cloud-native applications on **AWS (EC2, S3, Lambda, CloudWatch)** with **Docker** containerization, implementing **DevOps** best practices and **Continuous Integration** to accelerate release cycles and improve application availability to **99.5% SLA**.
- Applied **Agile and Scrum** methodologies in cross-functional teams, collaborating with product managers, QA engineers, and operations teams to translate requirements into scalable software solutions, delivering **12+ feature releases** on schedule with zero UAT rejections.
- Engineered **TypeScript**-based backend services and middleware to process and standardize environmental data through unified interfaces, integrating with **AWS** data pipelines and enabling sustainability analysis use cases for manufacturing and construction domain customers.
- Demonstrated strong **problem-solving** and **communication skills** in team meetings, presenting technical progress, conducting **code reviews** using **Git** branching strategies, and documenting architectural decisions in **Confluence**, ensuring team alignment and knowledge transfer across **8-person** engineering squads.

SKILLS

Programming Languages & Frameworks – TypeScript, Java, Python, Spring Boot, FastAPI, REST APIs, GraphQL, React, Angular.

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, GitHub, Git, Continuous Integration, CI/CD pipelines.

Testing & Quality Assurance – Automated testing frameworks, JUnit, pytest, test-driven development, code coverage.

Databases & Data Engineering – PostgreSQL, MySQL, Oracle, SQL, data modelling, ETL, data warehousing.

Methodologies & Tools – Agile, Scrum, Jira, source control, code review practices, Confluence.

Monitoring & Observability – CloudWatch, Splunk, Dynatrace, application performance monitoring, SLA management.

Data Analytics & Visualization – Power BI, Tableau, DAX, Python data stack (pandas, NumPy, scikit-learn), statistical analysis.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

PROJECTS

Environmental Data Standardization Platform – Cloud-Native API Suite (HCL Technologies)

- Architected and deployed a unified **TypeScript** and **Python** backend service suite on **AWS** (Lambda, EC2, S3) that ingested, normalized, and exposed environmental data through standardized **REST APIs** and **GraphQL** endpoints, enabling **150+** manufacturing and construction customers to integrate sustainability metrics into their workflows.
- Implemented **automated testing frameworks** (**Jest**, **pytest**) and **CI/CD pipelines** via **Jenkins** and **GitHub**, achieving **92%** code coverage and reducing post-deployment incidents by **75%** through continuous validation of API contracts and data schema consistency.
- Designed and deployed **Docker** containerized microservices with **DevOps** automation, leveraging **CloudWatch** for real-time monitoring and alerting, reducing mean-time-to-recovery (MTTR) from **45 minutes** to **8 minutes** and maintaining **99.7%** uptime across EMEA production environments.
- Led cross-functional **Agile** ceremonies (daily standups, sprint planning, retrospectives) with **Scrum** practices, collaborating with product managers and QA engineers to define sustainability data schemas and API contracts, delivering **3 major feature releases** across a **6-month** delivery cycle with zero scope creep.
- Mentored junior engineers on **TypeScript** best practices, **API design patterns**, and cloud deployment strategies, documenting architecture decisions and runbooks in **Confluence**, enabling a **4-person** on-call rotation to support the platform with minimal escalations.

SWIFT Payments Dashboard & ISO 20022 Data Pipeline (HCL Technologies)

- Developed and maintained enterprise-grade **REST APIs** and **SQL** data pipelines to aggregate and visualize SWIFT **MT/MX** message flows and **ISO 20022** payment transaction data, enabling banking operations teams to monitor **50,000+** daily cross-border payment messages with **real-time** alerting and compliance audit trails.
- Built automated **Python**-based **ETL** workflows and **scheduled jobs** on **AWS** to reconcile SEPA instant payments and tokenization transaction states across **PostgreSQL** and **Oracle** databases, achieving **99.8%** reconciliation accuracy and reducing manual intervention by **85%**.
- Collaborated with cross-functional teams including banking domain business analysts, regulatory compliance officers, and operations teams to gather requirements, design **GraphQL** query interfaces, and support UAT cycles, ensuring **GDPR** and data protection controls were embedded in all API responses and logging mechanisms.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
