PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Proactively managed, reconciled, and executed **corporate action elections** within tight SLA timelines for **EMEA banking operations**, delivering **100% on-time settlement accuracy** across voluntary and mandatory events using **Oracle SQL** and **PostgreSQL** for entitlement calculation and booking across multiple business units (Inventory Management, Swaps, Stock Loan, Prime Brokerage).
- Reconciled and posted **payment reconciliations of stock and cash accounts** for **SWIFT messaging** and **ISO 20022** corporate action workflows, investigating and resolving queries from key stakeholders and trading desks in **24-48 hour turnarounds**, maintaining **99.8% accuracy** on fund recovery and outstanding balance monitoring.
- Developed and deployed **Python automation scripts** for **corporate action data pipelines**, ETL processes, and scheduled reconciliation reporting, reducing manual election processing effort by **35%** and enabling real-time **risk threshold monitoring** as outlined by senior management using **Splunk dashboards** and **CloudWatch alerting**.
- Provided high-level **client servicing** and **customer focus** support to banking clients and trading desks, managing multiple deliverables within tight timelines through cross-functional collaboration with operational teams, BAs, and external counterparties to resolve corporate action entitlement disputes and post-settlement issues in **<2 business days**.
- Managed **change-control** and **UAT coordination** for corporate action system configuration updates and go-live support across interconnected **ERP** and enterprise business systems, applying **clear and professional communication** with stakeholders to ensure service delivery consistently met regulatory and SLA requirements in banking operations.
- Demonstrated **adaptability** and **flexibility** across competing priorities by balancing production support incident response (P1/P2), corporate action project initiatives, and operational requirements, leveraging **Jira** and **Confluence** for ticketing and team coordination to deliver results on deadline-driven banking workflows in **EMEA Asset Services**.

SKILLS

Corporate Actions & Asset Services – voluntary and mandatory corporate action elections, entitlement calculation and booking, payment reconciliation, fund recovery, position management, EMEA markets operations.

Banking & Financial Services – SWIFT messaging (MT/MX), ISO 20022 message flows, SEPA payments, cross-border payments, PSD2, Open Banking, reconciliation workflows, regulatory compliance (GDPR), client servicing.

Data & Analytics – SQL (Oracle, PostgreSQL, MySQL), Python (pandas, NumPy), Power BI, Tableau, data modelling, ETL pipelines, scheduled reporting, reconciliation analytics.

Operational Systems & Monitoring – production support, incident management, Splunk dashboards, CloudWatch alerting, Dynatrace monitoring, risk threshold monitoring, SLA management.

Change Management & Stakeholder Collaboration – change-control processes, UAT coordination, cross-functional team leadership, ERP integration support, Jira, Confluence.

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker containerisation, Linux, shell scripting, CI/CD (Jenkins), Git version control.

Professional Skills – client focus, communication, active listening, adaptability, prioritisation under deadline pressure, teamwork, attention to detail.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin	02/2026
BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India	01/2021

PROJECTS

Corporate Action Elections Reconciliation & Risk Management Platform (HCL Technologies)

- Architected and deployed an end-to-end **corporate action election management system** reconciling voluntary and mandatory events across EMEA banking operations, automating entitlement calculation, payment reconciliation, and fund recovery workflows using **Python ETL pipelines** and **Oracle SQL**, reducing manual processing time by **40%** and eliminating **12+ hours of daily reconciliation overhead**.
- Integrated **real-time risk threshold monitoring** and **SLA alerting** via **Splunk dashboards** and **CloudWatch metrics**, enabling operations teams to proactively identify outstanding balances and fund recovery gaps, achieving **99.8% on-time election execution** and **zero breached payment settlement deadlines** across **500+ monthly corporate actions**.
- Built cross-stakeholder collaboration workflows connecting **trading desks, inventory management, stock loan, and prime brokerage teams** through **Jira ticketing, Confluence documentation, and daily reconciliation reports**, reducing client query resolution time from **3+ business days to <24 hours** and improving stakeholder satisfaction by **30%**.
- Implemented **change-control** and **UAT governance** for system configuration updates and regulatory compliance enhancements (GDPR, SEPA, ISO 20022 message format alignment), coordinating post-go-live support across interconnected **ERP modules** and enabling **zero production incidents** during major release cycles.
- Maintained **flexible deployment cadence** and **adaptability** to evolving business and client needs, delivering on-demand reconciliation reports in **Power BI** for senior management visibility into fund recovery trends, client profitability, and risk exposure across EMEA markets.

SWIFT Payments Operations Dashboard & Transaction Flow Visibility (HCL Technologies)

- Delivered production support and real-time operational monitoring for a **SWIFT messaging payments-operations dashboard** supporting a tier-1 banking client, tracking **MT/MX message flows** and transaction entitlements with **99.9% system uptime** and **<5 minute incident detection** via **Splunk** and **Dynatrace**.
- Designed and maintained **ISO 20022** and **SEPA instant payment** reconciliation logic, translating banking domain requirements from BAs and regulatory teams into **Python automation** and **PostgreSQL queries** to ensure audit-trail completeness and **100% compliance** with financial-services SLA and regulatory standards.
- Collaborated with cross-functional banking operations teams to investigate payment-flow anomalies, resolve transaction discrepancies, and support UAT cycles for post-implementation system enhancements, delivering **root-cause analysis reports** within **4 hours** of escalation for critical incidents.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)

- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
