PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Bridged technical teams and business stakeholders across enterprise software projects at **HCL Technologies**, gathering and documenting requirements and translating them into clear, actionable user stories and functional specifications for Java/Spring Boot and Python-based applications serving **500+ banking users**.
- Supported the development lifecycle of a **SWIFT messaging and payments-operations dashboard**, conducting gap analysis and process mapping to identify software optimization opportunities; facilitated **UAT (User Acceptance Testing)** by creating test scripts, ensuring final product alignment with original business intent, and coordinating cross-functional workshops with banking-domain business analysts and operations teams.
- Assisted in the integration of **AI-driven automation workflows** and data-pipeline features into enterprise systems, defining use cases, data requirements, and success metrics for **Claude API-powered** content generation and **machine learning models**; validated performance against agreed KPIs through structured testing and stakeholder sign-off.
- Managed requirement elicitation through **stakeholder workshops, interviews, and Agile ceremonies** (daily standups, sprint planning, retrospectives) within **Scrum frameworks**; maintained project documentation and backlogs in **Jira and Confluence**, ensuring full traceability from business requirement to deployment.
- Applied analytical mindset to interpret complex operational data from **Splunk, Dynatrace, and CloudWatch monitoring dashboards**; created **Power BI dashboards and DAX measures** to present findings and KPIs to non-technical business stakeholders, enabling data-driven decision-making across production-support and financial-services operations.
- Demonstrated immediate availability and commitment to fast-paced delivery cycles, supporting **3-6 month sprint-based project cycles** with production-change management, UAT coordination, and post-go-live triage across interconnected banking and ERP systems while maintaining **SLA compliance** and regulatory audit trails.

SKILLS

Business Analysis & Requirements – requirement elicitation, user story creation, functional specifications, gap analysis, process mapping, stakeholder workshops, UAT design and coordination.

AI & Data Science – AI use-case definition, machine learning model evaluation, prompt engineering, Claude API integration, data requirements assessment, success metrics definition, automated workflow orchestration.

Agile & Project Management – Scrum frameworks, sprint planning, daily standups, retrospectives, Jira ticketing and backlog management, Confluence documentation, change-control management.

Business Intelligence & Analytics – Power BI dashboards, DAX measures, Power Query ETL, Tableau visualizations, data modelling, SQL analytics (PostgreSQL, MySQL, Oracle), statistical analysis, A/B testing.

Domain Expertise – banking and financial services, SWIFT messaging (MT/MX formats), ISO 20022 message flows, SEPA and cross-border payments, payments processing workflows, PSD2 / Open Banking, GDPR and regulatory compliance, ERP integration and enterprise business systems.

Technology & Tools – Java Spring Boot, Python, REST APIs, AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux, Jenkins CI/CD, Git, Splunk, Dynatrace, GitHub Actions, Vercel.

Communication & Presentation – presenting complex data to non-technical audiences, cross-functional collaboration, UAT facilitation, training-material creation, business-stakeholder engagement.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin	02/2026
BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India	01/2021

PROJECTS

SWIFT Payments-Operations Dashboard & Banking Integration (HCL Technologies)

- Supported the development lifecycle of a mission-critical **SWIFT messaging and payments-operations dashboard** for a leading banking client, acting as a bridge between technical development teams and banking-domain business analysts to gather, document, and validate requirements across payment-message flows.
- Conducted **gap analysis and process mapping** across payment transaction workflows (SEPA, ISO 20022, cross-border) to identify software optimization opportunities and AI-driven automation use cases; facilitated multi-stakeholder workshops to define business success metrics and data requirements for regulatory compliance (GDPR, audit trails).
- Designed and executed **UAT (User Acceptance Testing)** for dashboard features including transaction-flow visibility, operational alerting, and reconciliation workflows; created detailed test scripts, coordinated sign-off with banking operations teams, and triaged post-implementation defects, ensuring **SLA compliance** and zero-defect production deployment.

Ireland Jobs Tracker: AI Workflow Automation & Prompt Engineering (Personal Project)

- Built an end-to-end **AI workflow automation platform** integrating **Claude API (Anthropic)** to generate job-description-tailored resumes at scale using **structured-JSON prompt engineering** and constraint guardrails; orchestrated data flow from **Apify web scrapers** to JD ingestion, AI-powered content generation, and **reportlab PDF** output.
- Defined AI use cases, success metrics, and data requirements for the Claude integration; validated model outputs through structured testing against job-description features, ensuring relevance and constraint adherence across **100+ JD-tailored resume generations**.
- Deployed full-stack solution using **GitHub Actions CI/CD** and **Vercel** hosting, demonstrating hands-on proficiency in **AI-driven automation workflows, prompt engineering, API integration**, and rapid iteration cycles—directly applicable to AI feature development and deployment within Agile environments.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
