PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Managed production support and incident response for enterprise applications serving banking clients, achieving **99.2% SLA compliance** across P1/P2 incidents through real-time monitoring using **Splunk, CloudWatch, and Dynatrace**; coordinated with business teams and operations for root-cause analysis and post-incident documentation.
- Supported payments-operations infrastructure for **SWIFT messaging (MT/MX) transaction flows** and **ISO 20022 message processing**, ensuring regulatory compliance with **GDPR and financial services audit trails**; validated payment message integrity across **SEPA and cross-border payment corridors** with zero data-loss incidents.
- Executed change-control management for enterprise business systems including **ERP module configurations and system integrations**, coordinating **UAT coordination, testing cycles, and post-go-live support** across interconnected banking and operational platforms; reduced deployment risk by **40%** through structured change workflows.
- Developed and maintained **REST APIs and database-level integrations** across **PostgreSQL, MySQL, and Oracle** to support cross-system data flows; built **Python ETL automation scripts** for data validation, reconciliation reporting, and scheduled transaction pipelines serving **20+ daily production reports**.
- Deployed and monitored **containerized Java Spring Boot microservices** on **AWS infrastructure (EC2, S3, Lambda, CloudWatch)**; implemented **Jenkins CI/CD pipelines, Git branching strategies, and code review processes** to accelerate feature delivery and reduce production incidents by **35%**.
- Analyzed banking domain requirements through cross-functional collaboration with business analysts and regulators; translated **PSD2 Open Banking compliance, tokenization workflows, and reconciliation processes** into application support roadmaps and operational alerting rules; documented **SWIFT message formats and payment-flow visibility** for helpdesk enablement and training.

SKILLS

Application Support & Monitoring – Production support, incident response, SLA management, Splunk, CloudWatch, Dynatrace, alerting, root-cause analysis.

Banking & Payments Domain – SWIFT messaging (MT/MX), ISO 20022 message flows, SEPA, cross-border payments, PSD2 Open Banking, tokenization, payments reconciliation, regulatory compliance (GDPR), audit trails.

Enterprise Systems & Integration – ERP support, change-control management, UAT coordination, REST API integrations, database-level data flows, system interconnectivity, post-go-live support.

Backend Development & Cloud Infrastructure – Java Spring Boot, Python, REST APIs, AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux, shell scripting, log analysis.

Database Management – PostgreSQL, MySQL, Oracle, SQL queries, schema changes, data validation, ad-hoc reporting.

DevOps & CI/CD – Jenkins pipelines, Git branching, code reviews, Jira, Confluence, Agile/Scrum ceremonies.

Data Analytics & Business Intelligence – Power BI, Tableau, DAX, Power Query, data modelling, Python (pandas, NumPy, scikit-learn), R, statistical analysis.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin

02/2026

BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India

01/2021

PROJECTS

Enterprise Application Support Hub – Banking Incident Management & SWIFT Payment Monitoring Platform (HCL Technologies)

- Architected and deployed a **centralized application support dashboard** integrating **Splunk, Dynatrace, and CloudWatch** to provide real-time visibility into **SWIFT message transaction flows, ISO 20022 payment processing, and ERP system health** across production banking infrastructure serving 15+ client systems.
- Implemented automated incident escalation and SLA-tracking workflows using **Jenkins CI/CD pipelines and Python ETL automation** to detect payment anomalies, route P1/P2 incidents to on-call teams in **<2 minutes**, and generate regulatory audit reports for **GDPR and financial services compliance**; reduced mean time to resolution (MTTR) from 45 minutes to **12 minutes**.
- Developed **REST API integrations** connecting legacy **Oracle and PostgreSQL** banking databases to modern **AWS Lambda microservices** to enable real-time **reconciliation reporting, cross-border payment tracking, and PSD2 Open Banking transaction visibility**; processed **10M+ daily payment messages** with **99.95% accuracy**.
- Designed operational alerting rules and runbooks documenting **SWIFT message format validation, tokenization workflow recovery, and SEPA compliance checks**; trained helpdesk and operations teams through Confluence documentation and live UAT sessions, reducing support ticket resolution time by **30%**.
- Coordinated change-control processes for **ERP module updates and system configuration changes** affecting payment processing; managed **3-month ISO 20022 migration project** across interconnected systems with zero post-go-live production incidents through structured UAT and rollback planning.

Banking Operations Analytics Portal – Real-Time KPI & Regulatory Reporting Dashboard (HCL Technologies)

- Built a **Power BI executive dashboard** consolidating payment operations metrics, SLA compliance, and regulatory reporting across **SWIFT, SEPA, and cross-border payment corridors**; leveraged **DAX measures and Power Query ETL** to transform raw **PostgreSQL and Oracle transactional data** into **20+ interactive KPI visualizations** updated hourly.
- Engineered **Python data pipelines** orchestrating **pandas and NumPy transformations** to reconcile payment records across fragmented systems, detect discrepancies, and auto-populate compliance reports for GDPR and financial audit trails; delivered **40+ regulatory reports monthly** with **zero data integrity violations**.
- Deployed dashboard on **AWS cloud infrastructure** using **Lambda functions and S3 data staging** to enable real-time access for 50+ business stakeholders; reduced reporting cycle time from **3 days to 4 hours** and eliminated manual spreadsheet-based reconciliation, saving **35 hours/week** of operations team effort.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
