PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Architected and deployed **feature pipelines** for 3+ **production ML use-cases** (fraud detection, payments processing, identity verification) using **Python, SQL, and REST APIs**, reducing feature computation latency by **40%** and enabling real-time model inference at scale.
- Partnered with machine learning teams and cross-functional stakeholders to gather requirements, design **ML infrastructure** integrations, and deliver bespoke technical solutions in healthcare, finance, and recommendation-system domains; coordinated **pre-sales and post-sales customer onboarding** with **90%+ on-time delivery**.
- Developed and maintained **backend microservices** in **Java Spring Boot** supporting **ML feature serving**, built **data pipeline orchestration** workflows with **Python**, and optimized **PostgreSQL / MySQL** schemas for analytics workloads; achieved **99.8% service availability** through **SLA-driven incident response**.
- Implemented **MLOps infrastructure** components including **model monitoring dashboards** using **Power BI**, automated data validation pipelines with **Python (pandas, NumPy)**, and **CI/CD deployment automation** via **Jenkins** and **GitHub Actions**; reduced feature-validation errors by **65%**.
- Collaborated directly with sales teams and machine learning product managers in a high-growth fintech environment; conducted technical discovery calls, documented customer requirements in **Confluence**, and recommended feature-pipeline enhancements as customer business needs evolved; contributed to **3 successful customer implementations**.
- Demonstrated excellence in problem-solving, analytical storytelling, and written/verbal communication through UAT coordination, stakeholder briefings on **ML model performance metrics**, and peer engineering interviews; mentored junior engineers on backend best practices and **ML pipeline design patterns**.

SKILLS

Backend & Software Engineering – Java Spring Boot, Python, SQL (PostgreSQL, MySQL, Oracle), REST APIs, microservices architecture.

Machine Learning & Data Engineering – Feature pipeline development, ML infrastructure, MLOps, data validation, model monitoring, pandas, NumPy, scikit-learn.

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, GitHub Actions, Git, Linux.

Business Intelligence & Analytics – Power BI, Tableau, data modelling, DAX, analytical dashboards, business metrics reporting.

Domain Expertise – Finance & payments processing, fraud detection, identity verification, healthcare systems, recommendation engines, SLA management, incident response.

Collaboration & Leadership – Customer engagement, pre-sales & post-sales technical support, requirements gathering, cross-functional teamwork, technical communication.

Data & Machine Learning Stack – Python data science, statistical analysis, R, Hadoop, Spark, data warehousing, ETL, time-series analysis.

EDUCATION AND TRAINING

PROJECTS

ML Feature Pipeline for Payments Fraud Detection (HCL Technologies)

- Engineered end-to-end **feature pipeline infrastructure** supporting real-time fraud-prevention models for banking client; integrated **Python**-based feature transformations with **Java Spring Boot** microservices to serve **ML model inference** at **sub-100ms latency**.
- Built **data validation** workflows and **feature monitoring dashboards** in **Power BI** to track data quality and model feature drift; collaborated with ML team to define SLOs, detect anomalies, and trigger automated remediation alerts reducing false-positive fraud blocks by **28%**.
- Designed cross-system integrations via **REST APIs** and **database-level data flows** across **PostgreSQL** and **Oracle** to ingest transaction data, compute risk scores, and update real-time customer identities; coordinated with sales and customer success teams on post-go-live feature enhancements.

Ireland Jobs Tracker – LLM-Powered Resume & Workflow Automation (Personal Project)

- Built AI-driven automation platform integrating **Claude API (Anthropic)** with **prompt engineering** to generate job-description-tailored resumes at scale; orchestrated **end-to-end ML workflow** combining **Apify web scrapers**, JD ingestion pipelines, structured **JSON prompt constraints**, and **reportlab PDF generation**.
- Deployed production **CI/CD pipeline** via **GitHub Actions** and **Vercel** for automated job scraping, LLM content generation, and static-site publishing; demonstrated hands-on mastery of **API integration**, **workflow orchestration**, and **cloud deployment** directly applicable to ML infrastructure and feature-serving systems.
- Engineered guardrails and constraint-based prompting to ensure output quality and consistency; collected and analyzed **analytics metrics** on generation accuracy and customer engagement, informing iterative improvements to LLM prompt strategies and pipeline reliability.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
