PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed, developed, and deployed **Java Spring Boot microservices** in production environments supporting **highly available** payment-processing and collaboration platforms; implemented **REST APIs** for system integrations across PostgreSQL, MySQL, and Oracle databases, ensuring **99.9% uptime SLA** through rigorous testing and code review.
- Owned full lifecycle development of features and improvements across **agile teams**; architected **DevOps pipelines** using **Jenkins CI/CD**, **Git** branching strategies, and **Docker containerisation** to reduce deployment time by **40%** and enable continuous delivery at scale.
- Managed operational reliability and incident response for mission-critical systems using **Splunk**, **CloudWatch**, and **Dynatrace** monitoring; investigated **P1/P2 production issues** with data-driven troubleshooting, resolving **95% of incidents** within SLA through systematic root-cause analysis and automated remediation scripts.
- Developed **Python automation scripts** and **data pipelines** for ETL workflows, scheduled reporting, and operational intelligence; built **Power BI dashboards** and **Tableau visualisations** to surface real-time operational metrics to stakeholders, enabling faster decision-making and **30% reduction** in manual reporting overhead.
- Collaborated cross-functionally with product teams, business analysts, and operations on requirements gathering, UAT coordination, and post-implementation support; communicated technical trade-offs and quality concerns with precision and clarity in agile ceremonies (standups, retros, planning) and formal documentation.
- Leveraged **AWS cloud services** (EC2, S3, Lambda, CloudWatch) and **Linux administration** (shell scripting, log analysis, cron scheduling) to build scalable infrastructure; applied **scientific problem-solving** and **creative engineering skills** to tackle varied, complex technical challenges while maintaining high attention to detail and continuous learning mindset.

SKILLS

Programming Languages – Java, Python, JavaScript, C++, SQL.

Backend & Microservices – Spring Boot, REST APIs, microservice architecture, system integrations, event-driven design.

DevOps & Infrastructure – Jenkins CI/CD, Git, Docker, Kubernetes, AWS (EC2, S3, Lambda, CloudWatch), Linux, shell scripting.

Data Engineering & Analytics – Python (pandas, NumPy, scikit-learn), ETL, data pipelines, Power BI, Tableau, Power Query, SQL data modelling.

Monitoring & Reliability – Splunk, Dynatrace, CloudWatch, SLA management, incident response, production support.

Databases – PostgreSQL, MySQL, Oracle, schema design, query optimisation, data validation.

Collaboration & Methodologies – Agile/Scrum, Jira, Git workflows, code review, cross-functional teamwork, problem-solving, quality assurance.

EDUCATION AND TRAINING

PROJECTS

Payments Operations Dashboard (HCL Technologies)

- Architected and maintained a **full lifecycle microservice-based payments dashboard** supporting real-time transaction-flow visibility and operational alerting for a tier-1 banking client processing **500,000+ SWIFT messages daily**.
- Developed **Java Spring Boot backend services** and **REST APIs** to ingest, transform, and serve **ISO 20022 message flows**, SEPA instant payments, and cross-border payment data; integrated **PostgreSQL** and **Oracle databases** with optimised queries handling **50,000+ concurrent requests** per minute.
- Implemented **DevOps CI/CD pipelines** using **Jenkins**, **Git**, and **Docker** to automate build, test, and deployment workflows; reduced deployment cycles from **4 hours to 30 minutes** and enabled zero-downtime releases.
- Built **Splunk dashboards**, **Dynatrace monitoring**, and **CloudWatch alerting** for production observability; managed **P1/P2 incident response** across payment-processing workflows, maintaining **99.95% SLA uptime** with **sub-5-minute MTTR** for critical alerts.
- Collaborated with banking-domain business analysts and operations teams on requirements, UAT coordination, and post-go-live triage; documented system integrations, change-control procedures, and regulatory compliance workflows (GDPR, audit trails, reconciliation) in Jira and Confluence.

AI-Powered Resume Generation Platform (Ireland Jobs Tracker)

- Built an end-to-end **AI workflow orchestration system** leveraging the **Claude API (Anthropic)** to generate job-description-tailored resumes at scale; designed **structured-JSON prompt engineering** with constraint guardrails to ensure consistent, high-quality output across **200+ job descriptions**.
- Integrated **Apify scrapers** for JD ingestion, **claude-haiku-4-5 LLM inference** for intelligent content generation, and **reportlab PDF generation** for automated document creation; orchestrated the entire pipeline using **Python** with **async processing** achieving **3x throughput improvement**.
- Deployed full-stack application on **Vercel** with **GitHub Actions CI/CD** automation; implemented data validation, error handling, and logging to ensure **99.8% pipeline reliability** and **sub-2-second API response times** for real-time resume generation requests.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
