PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and deployed **cloud-native microservices** in **Java Spring Boot** and **Python**, achieving **99.95% uptime** through containerization with **Docker**, orchestration with **Kubernetes**, and distributed system patterns across hybrid cloud environments.
- Developed high-concurrency backend services in **Java** and **Python** supporting payment transaction flows; optimized API response times by **40%** through microservice decomposition, asynchronous processing, and database query tuning on **PostgreSQL** and **MySQL**.
- Built and maintained **REST APIs** for cross-functional platform integrations; collaborated with product, infrastructure, and operations teams to translate business requirements into scalable, production-grade service specifications and technical documentation.
- Troubleshoot, debugged, and upgraded mission-critical enterprise systems; reduced mean-time-to-resolution (MTTR) by **35%** through systematic root-cause analysis, automated alerting via **CloudWatch** and **Dynatrace**, and proactive reliability improvements.
- Containerized legacy and greenfield applications using **Docker** and deployed to **AWS** cloud infrastructure (**EC2, S3, Lambda, CloudWatch**), ensuring repeatable, portable delivery models and secure application deployment across staging and production environments.
- Orchestrated end-to-end cloud platform automation workflows using **Python** scripting, **GitHub Actions** CI/CD pipelines, and **API integrations**; eliminated manual operational overhead by **60%** and enabled rapid, reliable service delivery at scale.

SKILLS

Programming Languages – Python, Java, JavaScript, Golang, SQL.

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes, containerization, hybrid cloud, IaaS, PaaS.

Microservices & Architecture – microservice architecture, REST API design, distributed systems, API gateway patterns, service mesh fundamentals.

Databases & Data Engineering – PostgreSQL, MySQL, Oracle, database design, data modeling, schema management, ETL pipelines.

DevOps & Platform Engineering – CI/CD (Jenkins, GitHub Actions), Git, infrastructure-as-code, Linux, shell scripting, monitoring, reliability.

Data & Analytics – Power BI, Tableau, data visualization, DAX, Power Query, pandas, NumPy, scikit-learn.

Domain & Frameworks – Spring Boot, FastAPI, Flask, React, Angular, SWIFT messaging, ISO 20022, payments processing, SEPA, banking systems, ERP integration, GDPR compliance.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

PROJECTS

Cloud-Native Payments Platform Dashboard (HCL Technologies)

- Architected and deployed a **microservice-based transaction monitoring platform** supporting SWIFT messaging and ISO 20022 payment flows; implemented distributed services in **Java Spring Boot** and **Python** with **Kubernetes** orchestration across AWS hybrid cloud infrastructure.
- Designed scalable **REST APIs** for real-time transaction visibility and operational alerting; reduced alert latency by **50%** through event-driven architecture and asynchronous message processing, enabling SLA compliance and regulatory audit-trail requirements.
- Integrated **Docker containerization** and **CI/CD pipelines** (Jenkins, Git) for repeatable deployment of payment-operations services; collaborated cross-functionally with banking-domain BAs, operations teams, and infrastructure engineers to deliver platform upgrades with zero production downtime.

Ireland Jobs Tracker – AI-Powered Resume Automation (Personal Project)

- Built an end-to-end cloud-native application orchestrating **microservices** for job-description ingestion, LLM processing, and PDF generation; integrated **Python** backend with **Claude API (Anthropic SDK)**, structured **REST API** calls, and **GitHub Actions** CI/CD for automated deployment to **Vercel** cloud platform.
- Engineered high-concurrency data pipeline using **Python** (pandas, async processing) and Apify scrapers; optimized throughput to process **1000+ job descriptions/day** with **99.2% accuracy** through prompt engineering, constraint validation, and distributed API rate-limiting.
- Implemented infrastructure-as-code patterns with **GitHub Actions**, containerized deployment workflows, and cloud-native architecture; demonstrated expertise in **API design**, **distributed systems**, data engineering, and scalable platform automation aligned with modern SaaS delivery models.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
