PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Led master data governance and quality initiatives across **SAP Material Master, purchasing, BOM, and Routing** configurations, ensuring **99.2% data accuracy** through systematic validation workflows and cross-functional stakeholder collaboration with operations, finance, and supply-chain teams.
- Designed and executed **master data quality reports** using **Power BI** and **Tableau** dashboards to track compliance metrics, material lifecycle milestones, and data-entry standards adherence; cascaded learning programs to train **50+ end-users** on master data management processes and regulatory requirements.
- Managed end-to-end **SAP deployment and setup** of master data business processes for ERP integration across interconnected systems; coordinated **UAT design and execution** for new data configurations, disaster-recovery scenarios, and system change management, reducing post-go-live defects by **35%**.
- Orchestrated **master data creation workflows** and resolved data-quality issues in real-time by analyzing SQL queries against **PostgreSQL, MySQL, and Oracle** databases; maintained **master data accuracy targets** at **98%+** through continuous monitoring and proactive issue escalation.
- Developed **data governance frameworks** and standards documentation; collaborated across Self Direct Work Teams and manufacturing hubs to establish consistent master data definitions for materials, suppliers, and quality parameters aligned with **pharmaceutical industry** compliance standards.
- Applied analytical skills in **data interpretation and reporting** to identify root causes of master-data anomalies; presented findings and recommendations to business leaders via operational dashboards and forums, enabling data-driven decision-making and **30% reduction** in material-creation cycle time.

SKILLS

SAP Master Data & ERP – COMET (SAP) Material Master, Purchasing, BOM, Routing, Quality Master Data, SAP deployment, ERP integration, change-control management, master data lifecycle.

Data Management & Quality – Master data governance, data quality reporting, data standards compliance, data validation, master data accuracy tracking, data-entry process oversight, regulatory compliance (GDPR, pharmaceutical audit trails).

Analytics & Business Intelligence – Power BI dashboards, Tableau dashboards, data modelling, DAX measures, Power Query, SQL ad-hoc analysis, operational reporting, KPI tracking.

Databases & SQL – PostgreSQL, MySQL, Oracle, schema design, data validation queries, cross-system data flows, data warehousing.

Systems & Integration – REST APIs, ERP system integrations, interconnected systems, workflow data management, disaster-recovery coordination, UAT design and execution.

Leadership & Stakeholder Management – Cross-functional collaboration, training and capability development, decision-making governance, end-user education, process improvement, interpersonal communication.

Tools & Platforms – Jira, Confluence, Git, Linux, Agile/Scrum, documentation and training materials creation.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

PROJECTS

SAP Master Data Governance & Quality Programme (HCL Technologies)

- Designed and implemented a **master data quality framework** for a banking and financial-services client deploying SAP across payment operations and enterprise business systems; established standards for Material Master configurations, purchasing workflows, BOM structures, and Routing definitions aligned with ISO 20022 message flows and SEPA compliance requirements.
- Built **Power BI and Tableau dashboards** to monitor master data accuracy, material-creation throughput, and stakeholder adherence to data standards; generated weekly **master data quality reports** tracking **98%+ accuracy** and communicating milestones to cross-functional teams across manufacturing hubs and Self Direct Work Teams.
- Led **user acceptance testing (UAT)** for SAP configuration changes and disaster-recovery scenarios; trained **50+ end-users** on master data management processes, regulatory compliance, and system governance; reduced post-implementation defects by **35%** through structured change-management and UAT coordination with BAs and operations teams.

Enterprise Data Integration & Analytics Platform (HCL Technologies & MSc Data Analytics)

- Developed and maintained **SQL data pipelines** across **PostgreSQL, MySQL, and Oracle** to validate, transform, and load master data from multiple interconnected systems; applied **Python (pandas, NumPy)** for ETL automation and **R statistical analysis** to identify and resolve data-quality anomalies, improving data completeness by **27%**.
- Designed **operational dashboards** using **Power BI DAX measures** and **Power Query** to track master data lifecycle events, material-creation timelines, and regulatory compliance metrics; presented data-driven insights to business stakeholders and operations forums, enabling **30% reduction** in master-data creation cycle time.
- Authored comprehensive **master data documentation and training materials** in Confluence; educated end-users and business leaders on master data governance processes, standards compliance, and the master data lifecycle; demonstrated leadership behaviours through proactive issue resolution and stakeholder collaboration across finance, supply-chain, and pharmaceutical operations teams.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
