PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Reviewed and assessed data accuracy against client policies and compliance requirements using **Python** scripting and **SQL** queries across **PostgreSQL, MySQL, Oracle** databases; flagged discrepancies with **98% precision** and coordinated corrections with business teams to ensure regulatory adherence.
- Engaged with business stakeholders via outbound phone calls and email to verify information, update client platforms, and resolve data inconsistencies; achieved **95% first-contact resolution rate** and maintained detailed audit trails for compliance documentation.
- Processed high-volume data moderation tasks in a fast-paced, dynamic environment using **Python pandas, NumPy** for data validation pipelines; handled **5,000+ daily records** with attention to detail and problem-solving to meet SLA targets across multiple concurrent projects.
- Developed automated data quality monitoring dashboards using **Power BI** to surface moderation metrics, error trends, and compliance status; reduced manual reporting overhead by **40%** and enabled real-time visibility for stakeholders.
- Collaborated cross-functionally with internal teams, business analysts, and operations to gather requirements, document policy changes, and deliver training materials for platform updates; adapted quickly to shifting priorities and regulatory changes.
- Demonstrated adaptability and flexibility in a multilingual, globally distributed team environment; applied strong verbal and written communication skills to manage customer engagement, escalations, and complex data-driven investigations with accuracy and professionalism.

SKILLS

Data & Analytics – Python, pandas, NumPy, scikit-learn, SQL, data validation, data quality assessment, Power BI, Tableau, ETL pipelines.

Databases – PostgreSQL, MySQL, Oracle, schema analysis, ad-hoc querying, data integrity verification.

Compliance & Regulatory – GDPR, Data Protection, audit trails, regulatory requirements, policy adherence, compliance documentation.

Business Operations – customer engagement, stakeholder collaboration, requirements gathering, platform administration, Jira, Confluence.

Technical Fundamentals – Linux, shell scripting, Git, CI/CD concepts, REST APIs, cloud platforms.

Communication & Soft Skills – verbal communication, written communication, customer service, problem-solving, attention to detail, adaptability, fast-paced environment management.

Machine Learning & Statistical Analysis – supervised learning, unsupervised learning, pattern recognition, statistical testing, anomaly detection.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

PROJECTS

Enterprise Data Quality & Compliance Monitoring System (HCL Technologies)

- Architected and deployed an automated **Python**-based data moderation pipeline using **pandas**, **NumPy**, **scikit-learn** to review transactional records against enterprise client policies; processed **10,000+ daily records** with **99.2% accuracy**.
- Built **Power BI** dashboards to visualize moderation metrics, compliance status, error classifications, and SLA adherence; enabled stakeholders to identify policy violations in real-time and reduced manual audit cycles by **50%**.
- Integrated data validation workflows with **PostgreSQL**, **Oracle** backend systems to flag discrepancies and maintain audit trails; coordinated outbound verification calls with business teams to resolve exceptions and update client platforms.
- Documented moderation procedures, policy changes, and training materials for cross-functional teams; ensured **GDPR and regulatory compliance** across all data handling processes.

Ireland Jobs Tracker – AI-Driven Resume & Data Processing Automation (Personal Project)

- Engineered end-to-end automated workflow orchestrating **Python** data pipelines, **Claude API (Anthropic)** integration, and **reportlab PDF generation** to process job descriptions and generate tailored resume content at scale.
- Implemented **structured JSON prompt engineering** with constraint guardrails and validation logic; optimized throughput to generate **50+ customized documents** with **100% format consistency**.
- Deployed CI/CD pipeline using **GitHub Actions** and **Vercel** for automated testing, validation, and production deployment; achieved **zero-downtime** releases and maintained **99.8% uptime**.
- Applied data quality assessment and accuracy validation techniques to ensure generated content aligned with job requirements and compliance standards; demonstrated adaptability across multiple data formats and client use cases.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
