PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Reviewed and assessed data accuracy against client policies and compliance requirements in production environments, ensuring **99.2% accuracy** on transaction validation across **10,000+ daily records** using **Python** data validation scripts and **SQL** query frameworks.
- Engaged with business stakeholders via outbound communication and customer-facing interactions to verify information, update client platforms, and resolve data discrepancies; coordinated cross-functional UAT and post-implementation support with banking operations teams, achieving **95% first-contact resolution** on data modification requests.
- Executed **Python**-driven data moderation workflows including ETL pipelines, **pandas** data cleaning, and **scikit-learn** anomaly detection to flag non-compliant records; automated repetitive data review tasks using scheduled **Python** scripts, reducing manual review time by **40%**.
- Demonstrated adaptability and flexibility in dynamic, fast-paced production support environments, managing **P1/P2 incident response** for payment systems and enterprise applications; maintained focus on repetitive, detail-oriented compliance audits while responding to ad-hoc data review requests with **SLA adherence of 98%**.
- Applied excellent verbal and written communication skills in technical documentation, defect reports, and stakeholder briefs; created comprehensive data review guidelines and compliance checklists in **Confluence**, used across multilingual teams and regulatory audits.
- Leveraged problem-solving and judgment to triage complex data issues and recommend corrective actions; built **Python**-based decision-support tools using **Power BI** dashboards for data quality metrics, enabling management to identify systemic moderation gaps and improve client platform data integrity by **28%**.

SKILLS

Data Moderation & Quality Assurance – data accuracy assessment, policy compliance review, data validation, anomaly detection, record auditing, client platform verification.

Programming & Automation – Python, ETL pipelines, pandas, NumPy, scikit-learn, data cleaning, scheduled automation, shell scripting.

Databases & Queries – SQL, PostgreSQL, MySQL, Oracle, ad-hoc queries, data validation, schema analysis.

Business Intelligence & Reporting – Power BI, Tableau, data modelling, DAX measures, dashboard development, operational metrics reporting.

Communication & Stakeholder Engagement – verbal communication, written communication, customer engagement, cross-functional collaboration, UAT coordination, requirements gathering.

Compliance & Regulatory – GDPR, data protection, audit trails, SLA management, compliance documentation, regulatory adherence, incident response.

Technical Tools & Platforms – Jira, Confluence, Git, Jenkins, CloudWatch, Splunk, Dynatrace, Linux, Docker.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

PROJECTS

SWIFT Payments Data Moderation & Compliance Dashboard (HCL Technologies)

- Developed and maintained a **Python**-powered data moderation workflow for **SWIFT messaging** and payments-operations transaction review, processing **50,000+ monthly payment records** against banking client compliance policies, **ISO 20022** message standards, and **SEPA** / cross-border payment regulations.
- Built **Power BI** dashboards and **Python** data pipelines to aggregate and visualize data quality metrics, policy compliance rates, and moderation turnaround times; delivered **weekly compliance reports** to banking operations stakeholders, enabling proactive identification of systemic data issues.
- Executed detailed data accuracy reviews of transaction flows, message formats, and regulatory compliance fields; collaborated with banking domain business analysts and operations teams to verify business data against client platforms, resolving **98% of flagged discrepancies** within **24 hours**.

Automated Data Validation & Remediation System (HCL Technologies)

- Engineered an end-to-end **Python**-based data validation framework using **pandas**, **NumPy**, and **scikit-learn** to automatically assess **PostgreSQL** and **Oracle** enterprise data against predefined client policies; flagged anomalies and non-compliant records with **92% precision**, reducing manual review overhead by **35%**.
- Orchestrated **scheduled Python scripts** and **ETL pipelines** to ingest raw transactional data, cleanse and validate fields, and generate daily moderation reports published to **Power BI**; automated data quality scorecards and compliance checklists distributed across multilingual support teams.
- Implemented decision-support logic to categorize data issues by severity and remediation path; provided problem-solving recommendations and judgment-based triage to operations teams, enabling faster resolution of **high-priority data compliance gaps** and improving overall client platform data integrity by **28%**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
