PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Managed lab equipment validation projects from software installation through business release, generating **Design Specifications, Configuration Specifications, Testing Plans, Security Plans, and Test Summary Reports** in accordance with **GMP guidelines** and site procedures; coordinated UAT and post-implementation validation across **3+ enterprise systems**.
- Analyzed and challenged software releases to identify compliance gaps and data integrity risks; performed **21 CFR Part 11** requirements mapping, **Electronic Records / Electronic Signatures (ER/ES)** validation, and **data integrity guidelines** assessment against regulatory frameworks for laboratory and manufacturing operations.
- Prioritized and monitored **Computer System Validation (CSV)** activities in line with project schedules and budgets; tracked validation milestones, defect resolution, and compliance sign-offs across interconnected lab systems using **Jira, Confluence**, and formal change-control procedures.
- Reviewed and validated software release notes, patch deployments, and configuration changes for **lab instruments and manufacturing operations systems**; performed regression testing and security impact analysis to ensure data integrity and regulatory compliance pre-release.
- Built cross-functional relationships with laboratory operations teams, quality assurance, regulatory affairs, and business stakeholders; communicated validation findings, compliance status, and remediation plans through **formal testing reports, executive summaries, and training materials**.
- Supported **compliance-critical production environments** where audit trails, regulatory governance, and SLA requirements were first-class concerns; managed incident response for validation failures and conducted root-cause analysis aligned with GMP procedures.

SKILLS

Computer System Validation (CSV) – Design Specifications, Configuration Specifications, Testing Plans, Security Plans, Test Summary Reports, GMP guidelines, validation documentation.

Regulatory & Compliance Frameworks – 21 CFR Part 11, Electronic Records / Electronic Signatures (ER/ES), data integrity guidelines, audit trails, GMP (Good Manufacturing Practice), regulatory governance.

Lab Systems & Manufacturing Operations – lab equipment validation, instrument management, manufacturing operations support, business release coordination, compliance-critical environments.

Software & Release Management – software release note analysis, patch validation, configuration change management, regression testing, security impact assessment, version control, Git.

Quality & Compliance Tools – Jira, Confluence, change-control procedures, UAT coordination, defect tracking, audit documentation, formal testing procedures.

Cross-Functional Communication – oral and written communication, stakeholder management, testing reports, executive summaries, training materials, regulatory liaison.

Technical Foundation – Java, Spring Boot, Python, SQL (PostgreSQL, MySQL, Oracle), REST APIs, Docker, Linux, AWS (EC2, S3, Lambda, CloudWatch), Jenkins CI/CD.

EDUCATION AND TRAINING

PROJECTS

Lab System Validation & Compliance Framework (HCL Technologies)

- Designed and executed **Computer System Validation (CSV)** activities for laboratory instrument deployments, generating **Design Specifications, Configuration Specifications, Testing Plans, and Security Plans** aligned with **21 CFR Part 11** and **GMP guidelines**.
- Analyzed software releases for **data integrity** and **Electronic Records / Electronic Signatures (ER/ES)** compliance gaps; identified and documented **15+ regulatory risks** and remediation pathways across lab systems.
- Created formal **Test Summary Reports** and validation sign-off documentation for business release; coordinated UAT across laboratory operations and quality assurance teams, achieving **100% regulatory compliance** pre-deployment.
- Managed validation project schedules, budgets, and milestone tracking using **Jira** and **Confluence**; implemented change-control procedures for software updates and configuration changes in compliance-critical lab environments.

Manufacturing Operations System Integration & Validation Support (HCL Technologies)

- Provided systems validation expertise for newly purchased instruments and manufacturing operations platforms; reviewed software release notes and patch deployments for compliance with **21 CFR Part 11 data integrity guidelines** and audit-trail requirements.
- Performed regression testing and security impact analysis on software updates; validated that system configurations maintained **Electronic Records (ER)** and **Electronic Signatures (ES)** compliance across interconnected lab and manufacturing systems.
- Collaborated cross-functionally with laboratory operations, quality assurance, and regulatory affairs to communicate validation findings and compliance status; delivered **executive-level testing reports** and **training materials** for validation procedures.
- Tracked and resolved validation defects and compliance findings; coordinated post-implementation triage and change-control approvals to ensure business systems remained within regulatory and GMP governance frameworks.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
