PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Captured and documented institutional knowledge from enterprise banking and payments operations teams, translating complex SWIFT MT/MX workflows and ISO 20022 message flows into structured process definitions; designed user-friendly workflow visualizations reducing process ambiguity by **40%** across cross-functional stakeholders.
- Conducted end-to-end process improvement analysis across ERP and business system integrations, identifying dependencies, exception use cases, and automation opportunities; recommended standardization that improved operational consistency and reduced manual handoffs by **35%**.
- Analyzed client operational data using **SQL** and **Python** to build business cases demonstrating measurable value; developed **Power BI** dashboards and executive summary reports quantifying productivity gains, SLA improvements, and cost savings for senior stakeholder sign-off.
- Trained and coached enterprise client stakeholders on effective system adoption through live demonstrations, user guides, and hands-on workshops; measured training effectiveness and iterated on delivery based on user feedback, achieving **85%** platform proficiency across teams.
- Managed change control and UAT coordination across interconnected enterprise systems; ensured process changes aligned with regulatory compliance (GDPR, data protection, audit-trail requirements) and documented post-implementation outcomes for continuous improvement.
- Provided expert product feedback by identifying feature gaps and optimization opportunities during client engagements; synthesized feedback from multiple sources and presented recommendations to product leadership, directly influencing platform roadmap for process engineering capabilities.

SKILLS

Process Engineering & Optimization – process documentation, workflow design, process improvement methodology, dependency mapping, exception handling, standardization and optimization, institutional knowledge capture.

Business Analysis & Communication – requirements gathering, stakeholder engagement, client-facing facilitation, cross-functional collaboration, business case development, executive reporting, user training and adoption.

Data Analysis & Business Intelligence – SQL (PostgreSQL, MySQL, Oracle), Python (pandas, NumPy, scikit-learn), Power BI (dashboards, DAX measures, data modelling, Power Query ETL), Tableau, data visualization, statistical analysis, hypothesis testing.

Enterprise Systems & Integration – ERP support and integration, REST API integration, change-control management, enterprise business system configuration, cross-system data flows, UAT coordination, production support.

Domain Expertise – payments operations, SWIFT messaging (MT/MX), ISO 20022 message flows, SEPA and cross-border payments, PSD2 and Open Banking, regulatory compliance (GDPR, data protection), banking client operations, financial services SLA management.

Technical Skills – Java Spring Boot, REST APIs, AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux, Git, Jenkins CI/CD, Jira, Confluence, schema design, ad-hoc query optimization.

Additional Capabilities – Microsoft Excel (advanced), agile and scrum ceremonies, incident response and P1/P2 triage, monitoring and alerting (Splunk, Dynatrace), Github Actions, Vercel deployment, prompt engineering and AI workflow automation.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin	02/2026
BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India	01/2021

PROJECTS

Enterprise Payments Operations Dashboard & Process Optimization (HCL Technologies)

- Worked directly with banking client to capture and document SWIFT messaging workflows, payment transaction flows, and operational alert procedures; translated institutional knowledge into structured process definitions within enterprise dashboard platform.
- Identified process bottlenecks and exception handling gaps through detailed analysis of transaction logs and alert patterns; recommended workflow improvements and Confidence-style platform features that reduced manual intervention by **30%** and improved SLA compliance from **94%** to **99.2%**.
- Developed **Power BI** operational dashboards and business cases demonstrating measurable ROI for payments operations team; presented executive summary to C-suite stakeholders quantifying efficiency gains, risk reduction, and cost savings.
- Trained and coached payments operations and business analyst teams through live product demonstrations and comprehensive user guides; measured adoption metrics and iterated on training delivery to achieve effective platform utilization across **50+** users.

Ireland Jobs Tracker – AI-Driven Process Automation & Workflow Orchestration (Personal Project)

- Architected and deployed end-to-end AI workflow automation integrating **Claude API (Anthropic)** with **Apify** scrapers, structured JSON prompt engineering, and **reportlab** PDF generation; orchestrated multi-step process from data ingestion through intelligent content generation to automated deployment.
- Designed constraint-based prompt engineering and guardrail logic to ensure consistent, high-quality outputs at scale; optimized workflow efficiency and cost using **claude-haiku-4-5** model selection and structured prompt architecture.
- Implemented continuous deployment pipeline using **GitHub Actions** and **Vercel**, automating build, test, and release processes; demonstrated proficiency in DevOps workflow orchestration and modern deployment best practices.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
