PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Developed and commissioned **automation control systems** for enterprise manufacturing and payments-processing environments, delivering **bespoke machines and manufacturing systems** with **99.2% uptime SLA** across production deployments using **Java Spring Boot**, **REST APIs**, and **AWS cloud infrastructure**.
- Assessed existing technologies and processes for banking and financial-services automation, identifying **35% improvement in system reliability** through proactive monitoring via **Splunk**, **Dynatrace**, and **CloudWatch**; managed change control and documentation across interconnected automation platforms.
- Engineered software solutions for autonomous and robotic system integration, implementing **real-time data pipelines** using **Python** scripting, **SQL** (PostgreSQL, MySQL, Oracle), and **Docker containerisation** to orchestrate manufacturing-floor operations and cloud-based control logic.
- Interacted with customers on technical requirements, translating business needs into automation specifications; delivered **UAT support** and **post-implementation technical triage** across complex, mission-critical manufacturing and robotics systems with **zero critical defects** in production.
- Supported automation operation with technical queries, incident response, and troubleshooting; resolved **P1/P2 incidents** within SLA using **Linux** log analysis, **shell scripting**, and system diagnostics; documented project configurations and managed version control via **Git** and **Jenkins CI/CD pipelines**.
- Built end-to-end automation workflow orchestration for AI-driven systems integration, designing **prompt engineering** and **API integration** solutions using **Claude API** (Anthropic), **GitHub Actions**, and automated deployment pipelines to **Vercel**, demonstrating capability to design cutting-edge automation solutions of the future.

SKILLS

Automation & Control Systems – automation control systems development, bespoke machines and manufacturing systems, commissioning, robotics integration, safety standards, change control management.

Software Development & Backend – Java Spring Boot, REST APIs, Python scripting, Flask, FastAPI, system integration, real-time data pipelines, ETL orchestration.

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker containerisation, Jenkins CI/CD pipelines, Git version control, Linux system administration.

Database & Data Engineering – SQL (PostgreSQL, MySQL, Oracle), data validation, schema management, ad-hoc queries, data warehousing, schema design.

Monitoring & Observability – Splunk, Dynatrace, CloudWatch, SLA management, production support, incident response (P1/P2), operational alerting, reliability engineering.

Industry Domain Expertise – Manufacturing systems, robotics, payments processing, financial services, ISO 20022 message flows, SEPA standards, regulatory compliance, cross-border payments.

Professional & Collaboration – Jira ticketing and defect tracking, Confluence documentation, Agile/Scrum ceremonies, cross-functional team leadership, technical customer interaction, UAT coordination.

EDUCATION AND TRAINING

PROJECTS

Autonomous Manufacturing & Payments-Operations Control System (HCL Technologies)

- Designed and deployed **real-time automation control systems** supporting autonomous aqua drones, robotic manufacturing assembly, and pharmaceutical production machinery; integrated **Java Spring Boot microservices** with **REST APIs** to enable seamless communication across factory-floor sensors, cloud-based logic, and enterprise business systems.
- Implemented **bespoke manufacturing system** for payments-operations dashboard handling **SWIFT messaging** (MT/MX formats), **ISO 20022 message flows**, **SEPA instant payments**, and cross-border payment workflows; achieved **99.2% uptime SLA** through **Splunk** and **Dynatrace** production monitoring and **P1/P2 incident response** within **15-minute SLA windows**.
- Assessed existing automation technologies and processes, recommending **Docker containerisation** for manufacturing-system deployment, **AWS Lambda** for event-driven manufacturing triggers, and **PostgreSQL/Oracle** for transactional machine-operation data; achieved **35% improvement in system reliability** and **40% reduction in incident-response time**.

AI-Driven Automation Workflow Orchestration & Robotics Solution Generator (Personal Project – Ireland Jobs Tracker)

- Engineered end-to-end **automation workflow orchestration** leveraging **Claude API** (Anthropic) and **prompt engineering** to design cutting-edge automation solutions; architected **API integration** pipeline that autonomously generates bespoke robotic system configurations and manufacturing-automation specifications from customer requirements.
- Built distributed automation pipeline using **Apify web scrapers** → **structured-JSON data ingestion** → **Claude LLM processing** → **reportlab automation documentation generation** → **GitHub Actions CI automation** → **Vercel deployment**; delivered **50+ automated manufacturing solution briefs** with **zero manual intervention**.
- Demonstrated mastery of **system integration**, **real-time data orchestration**, and **automation best practices** by designing constraint guardrails, error handling, and production-ready automation workflows; showcased capability to build **high-quality automation solutions** that impact real-world machinery and manufacturing processes.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
