PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Led elicitation, analysis, and documentation of business requirements across enterprise Java/Spring Boot and ERP integration programmes, translating complex banking operations workflows into **clear, actionable functional and non-functional specifications** aligned with transformation outcomes; managed requirement traceability through **Jira** and **Confluence**, achieving **100% sign-off** from business SMEs and stakeholders.
- Owned User Acceptance Testing strategy and execution for **SWIFT messaging/payments-operations dashboards** supporting **SEPA, ISO 20022 message flows, and cross-border payments** processing; coordinated UAT tester readiness, defect management, business sign-off, and requirement traceability, identifying and escalating **15+ critical gaps** pre-deployment and ensuring **zero post-go-live regulatory compliance incidents**.
- Designed and facilitated **business requirement workshops and playback sessions** with banking-domain SMEs, operations teams, and regulatory stakeholders to define target-state processes, data needs, and customer journeys; built stakeholder credibility through expertise in **GDPR, Data Protection, audit trails, and financial-services SLA management**, accelerating alignment cycles by **30%**.
- Supported deployment planning and business readiness across **6 system cutover activities**, coordinating change-control management, business process updates, operational controls, and stakeholder communication; partnered with Change & Organisation Design to develop training materials and onboarding guides, ensuring **95% operational adoption** on day-one.
- Evaluated solution quality throughout development cycles by conducting **SQL data validation, schema-change impact assessments, and cross-system integration testing** across **PostgreSQL, MySQL, and Oracle**; challenged assumptions and proposed process-simplification improvements, reducing monthly reconciliation effort by **22%** and enhancing customer experience through streamlined payment workflows.
- Delivered analytical support for business cases and impact assessments using **Power BI dashboards, DAX measures, and data modelling**; synthesized production monitoring data from **Splunk, CloudWatch, and Dynatrace** into executive-ready reports demonstrating transformation ROI; identified **8 continuous improvement opportunities** to standardize ways of working and enhance operational resilience across interconnected enterprise systems.

SKILLS

Business Analysis & Requirements Management – requirements elicitation and analysis, functional and non-functional specification management, requirement traceability, business requirement workshops, stakeholder alignment, process definition, target-state design, user journey mapping.

Testing, Quality Assurance & Validation – UAT strategy and coordination, test plan and test-script development, tester readiness and training, defect management and escalation, business sign-off, requirement validation, solution quality evaluation, data validation, impact assessment.

Deployment, Change Management & Business Readiness – deployment planning and cutover coordination, business process and control updates, change-control management, stakeholder communication planning, training material development, operational adoption monitoring, readiness checkpoints.

Financial Services Domain & Regulatory Compliance – SWIFT messaging (MT/MX), ISO 20022 message flows, SEPA and instant payments, cross-border payments processing, PSD2 and Open Banking, payments

reconciliation, tokenization, GDPR and Data Protection, audit trails, regulatory compliance, financial-services SLA management.

Enterprise Systems & Integration – ERP integration support, REST API integrations, cross-system data flows, PostgreSQL, MySQL, Oracle, schema design and change management, interconnected business systems, database-level integration, change control.

Business Intelligence & Analytics – Power BI dashboards and DAX measures, Tableau interactive visualizations, data modelling and data warehousing, Power Query ETL, business case development, executive reporting, KPI definition and tracking, analytics and options assessment.

Tools & Platforms – Jira, Confluence, Splunk, CloudWatch, Dynatrace, Git, Jenkins, AWS (EC2, S3, Lambda), Docker, Linux, Power BI, Tableau, Python, SQL, R, scikit-learn, pandas, NumPy.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin	02/2026
BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India	01/2021

PROJECTS

Multi-Year Digital Transformation – Business Requirements & UAT Delivery Platform (HCL Technologies / Banking Client)

- Led end-to-end business analysis and requirements management for a **multi-year transformation programme** spanning **SWIFT/ISO 20022 payments modernisation, SEPA compliance, and ERP integration**; elicited, analysed, and documented **120+ functional and non-functional requirements** across payments operations, reconciliation, and regulatory workflows, achieving **100% traceability** and stakeholder sign-off through Jira/Confluence.
- Designed and executed comprehensive **UAT strategy and test plans** validating payments-processing accuracy, ISO 20022 message-flow compliance, and GDPR/audit-trail controls; coordinated tester readiness across **3 business teams and 8 system stakeholders**, managed **42 defects** through resolution and sign-off, and delivered **zero critical post-go-live incidents** across **6 phased cutover activities**.
- Facilitated **12 business requirement workshops and playback sessions** with banking SMEs, operations leadership, and regulators to define target-state SEPA processes, cross-border payment data requirements, and customer journey enhancements; challenged assumptions on reconciliation complexity, resulting in **3 process-simplification recommendations** reducing monthly manual effort by **22%**.
- Supported **deployment planning and business readiness** for go-live, coordinating cutover activities, business-process documentation, operational-control updates, and change-communication strategy; partnered with Change & Organisation Design to develop **15 training modules** and **onboarding guides**, achieving **95% operational adoption** on day-one and **3-day ramp-to-productivity**.
- Delivered business impact analysis and continuous-improvement recommendations using **Power BI dashboards and data modelling** to visualize post-transformation KPIs (payments throughput, reconciliation cycle time, regulatory breach risk); synthesized **Splunk/Dynatrace operational metrics** and **SQL-based data validation reports**, identifying **8 standardization opportunities** and quantifying **€180K annual operational savings** to secure executive buy-in for Phase 2.

Banking Payments Operations Dashboard – SWIFT/ISO 20022 & GDPR Compliance (HCL Technologies / Banking Client)

- Analysed and documented business requirements for a **real-time payments-operations dashboard** supporting **SWIFT MT/MX messaging, ISO 20022 compliance, SEPA/cross-border transaction flows**, and regulatory

audit trails; elicited non-functional requirements around SLA management, data governance, and GDPR compliance through interviews with **8 banking operations SMEs** and regulatory stakeholders.

- Coordinated UAT execution and defect triage for **payment message-flow visibility, transaction reconciliation accuracy, and GDPR audit-trail logging**; validated **SQL schema changes and data-model updates** across **Oracle and PostgreSQL**, ensuring **zero data-integrity issues** in production and **100% audit-trail coverage** for regulatory compliance.
- Drove process-improvement recommendations to simplify transaction-flow monitoring and reduce **P1/P2 incident response time by 35%**; collaborated with operations teams and ERP integration partners to standardize payment-status definitions and reconciliation workflows, enhancing **customer experience transparency** and **operational resilience** across **3 interconnected enterprise systems**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
