PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Delivered **Level 2 technical and test support** to enterprise customers during online test sessions and offline ticket support, managing **P1/P2 incident response** and root cause analysis across **Java Spring Boot** and **.NET applications** in production environments at HCL Technologies.
- Designed and maintained expertise in **application process flows and system architecture**, coordinating with support and development teams to resolve **application and system issues**, identify bottlenecks, and perform **root cause assessment** across server domains to ensure **application availability** and **SLA compliance**.
- Administered and resolved **Microsoft SQL Server** database issues, designed **SQL queries** for diagnostics and validation, performed **schema changes**, and provided **database-level troubleshooting** across **PostgreSQL, MySQL, and Oracle** platforms to support application stability and data integrity.
- Coordinated with **UAT departments** to assist in **releases and deployments** to staging and production environments, managed **change-control workflows**, performed **post-deployment verification**, and documented all system configurations and release artifacts for audit and compliance purposes.
- Diagnosed and resolved **complex application issues** ranging from medium to high complexity using **Splunk, CloudWatch, and Dynatrace** for monitoring and troubleshooting, creating **root cause analysis reports** and recommending performance optimization solutions with documented evidence and metrics.
- Demonstrated **customer-focused technical support** through excellent written and verbal communication with internal engineering teams and external stakeholders, maintained **professional relationships** across departments, prepared comprehensive **issue documentation and solutions**, and delivered **proactive problem-solving** in fast-paced production environments.

SKILLS

Application Support & Diagnostics – application issue resolution, root cause analysis, system troubleshooting, performance diagnosis, IT hardware and software knowledge.

Database Technologies – Microsoft SQL Server, PostgreSQL, MySQL, Oracle, SQL fluency, database administration, schema management, query optimization.

Monitoring & Observability Tools – Splunk, Dynatrace, CloudWatch, application performance monitoring, alert configuration, SLA management.

Release & Deployment Management – UAT coordination, environment configuration, change-control management, deployment verification, post-go-live support.

Cloud Infrastructure & APIs – AWS (EC2, S3, Lambda, CloudWatch), system integrations, REST API diagnostics, Postman for HTTP/S request testing.

Development Technologies – Java Spring Boot, .NET, Python scripting, Docker containerization, Linux administration, Git, Jenkins CI/CD.

Professional Skills – customer support, technical documentation, issue reporting, attention to detail, multitasking, proactive problem-solving, flexibility, complex technical learning.

EDUCATION AND TRAINING

PROJECTS

SWIFT Payments Operations Dashboard Support (HCL Technologies)

- Provided **Level 2 test support and production support** for a **SWIFT messaging** and payments-operations dashboard serving a banking client, coordinating **online test sessions** and **offline ticket support** for transaction-flow visibility and operational alerting.
- Designed expertise in **payment message flows**, **ISO 20022 message structures**, and **SEPA / cross-border payments processing**, administered **application and system issues** related to payment reconciliation and message validation, and performed **root cause assessment** on message routing and database-level data flows.
- Coordinated with **UAT and customer support teams** to resolve **complex application issues**, prepared comprehensive **issue documentation** including **root cause analysis reports**, recommended performance optimizations for payment throughput, and ensured **SLA compliance** in regulatory and audit-sensitive production environments.

Enterprise Business Systems Support & Integration (HCL Technologies)

- Supported **ERP and enterprise business system administration**, coordinating **UAT and deployments** across interconnected systems including application servers, databases, and business platforms used by enterprise banking clients.
- Resolved **application and system issues** spanning **multiple server domains** through **system integration diagnostics**, **database troubleshooting** across **Microsoft SQL Server**, **PostgreSQL**, and **Oracle**, and **REST API testing** to ensure connectivity and data flow integrity.
- Managed **change-control workflows** for system configuration updates, performed **post-deployment verification** across staging and production environments, maintained **professional relationships** with engineering and operations teams, and delivered detailed **technical documentation and solutions** for all issues resolved.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
