PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed, implemented and delivered **healthcare system interface solutions** across **HL7, FHIR, TCP/IP, and ASTM** messaging standards for **electronic patient record (EPR) interoperability**, achieving seamless data exchange between Dedalus applications and third-party healthcare systems in production environments.
- Performed technical analysis, data mapping and configuration of **interface work packages** supporting healthcare application integrations; created **logical and physical data models** and managed **interface testing** including test stubs, test harnesses, and customer acceptance test (CAT) documentation for clinical systems.
- Led troubleshooting and support of healthcare integration issues with clinical risk exposure; conducted **impact analysis** on product upgrades and release notices, evaluated change requests for existing interfaces, and delivered specifications according to established standards in alignment with healthcare regulatory and interoperability requirements.
- Managed **multi-project implementation workflows** across healthcare application deployments, coordinating with Dedalus project teams, clients, and third-party vendors; performed **configuration management, change control, and UAT coordination** for integrated healthcare systems supporting GDPR compliance and audit-trail requirements.
- Architected end-to-end data integration pipelines using **REST APIs, SQL (PostgreSQL, MySQL, Oracle), and Python ETL** workflows to synchronize healthcare application data; applied **JSON and structured data modelling** techniques to map clinical messaging formats and ensure data integrity across interconnected health systems.
- Developed operational dashboards and health system monitoring solutions using **AWS CloudWatch, Splunk, and Dynatrace** to track interface throughput, message queuing, and system reliability metrics; implemented **CI/CD pipelines (Jenkins, Git)** and **Docker containerisation** to automate healthcare integration deployments and reduce time-to-production by **30%**.

SKILLS

Healthcare Integration & Messaging Standards – HL7 (v2, v3, FHIR), ASTM, TCP/IP, JSON, ISO 20022, interface design and implementation, electronic patient record (EPR) interoperability.

Integration Engineering & System Design – Interface architecture, data mapping, logical and physical data modelling, test harness design, test stub creation, configuration management, change control, healthcare application integrations.

Healthcare Systems & Domain Knowledge – Healthcare application systems, clinical workflows, regulatory compliance (GDPR, healthcare audit trails), third-party vendor integrations, healthcare operations, cross-border healthcare data exchange.

Data Integration & ETL – Python (pandas, NumPy), SQL (PostgreSQL, MySQL, Oracle), REST APIs, data warehousing, pipeline orchestration, ETL workflows, schema mapping and validation.

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins CI/CD pipelines, Git version control, Linux, monitoring and operational alerting.

Analysis & Documentation – Technical requirements analysis, specification writing, test documentation, CAT planning and execution, impact analysis, root-cause investigation, business and clinical collaboration.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin

02/2026

BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India

01/2021

PROJECTS

Healthcare System Integration Platform (HCL Technologies)

- Designed and implemented **HL7 and FHIR-compliant interface solutions** connecting **Dedalus healthcare applications** with third-party clinical and operational systems, supporting **electronic patient record (EPR) interoperability** across multiple healthcare client deployments.
- Conducted **technical analysis and data mapping** for healthcare messaging standards, created **logical and physical data models** to represent clinical workflows and patient data flows, and produced comprehensive interface specifications aligned with healthcare regulatory and interoperability standards.
- Executed full-cycle **testing and documentation activities** including design of **test harnesses and test stubs**, execution of internal integration tests and **customer acceptance tests (CAT)**, and generation of clinical validation evidence for healthcare compliance and audit requirements.
- Partnered with **Dedalus project teams, healthcare clients, and third-party vendors** to troubleshoot integration issues, perform **change impact analysis** on product upgrades, and deliver timely resolutions for healthcare system incidents with clinical risk exposure.
- Orchestrated **multi-system configuration management and change control** across interconnected healthcare applications; coordinated **UAT** and post-go-live support to ensure **GDPR compliance**, audit-trail integrity, and data security across healthcare deployments.

Healthcare Data Integration & Operational Monitoring (HCL Technologies)

- Built end-to-end **healthcare data integration pipelines** using **Python (pandas, NumPy)**, **SQL (PostgreSQL, MySQL, Oracle)**, and **REST APIs** to enable seamless data synchronization between **Dedalus applications and external healthcare systems**; implemented **JSON-based structured data mapping** to represent clinical messaging formats and healthcare data models.
- Designed and deployed **operational dashboards** using **AWS CloudWatch, Splunk, and Dynatrace** to monitor healthcare interface health, message throughput, queuing latency, and system reliability; created **automated alerting** for clinical integration failures and SLA breaches, improving incident response time by 25%.
- Implemented **CI/CD pipelines using Jenkins and Git** to automate healthcare integration deployments; containerized integration solutions with **Docker** and deployed to **AWS (EC2, Lambda, S3)**, reducing time-to-production and improving consistency across healthcare client environments.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
