PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Built and deployed **production systems in Python, Java, and SQL** detecting and responding to fraud, abuse, and cybercrime patterns across enterprise payment and transaction platforms; designed **agentic systems and AI-enabled workflows** that reduced manual investigation time by **40%** and improved incident response SLA compliance to **98%**.
- Engineered **cybercrime detection signals and decisioning logic** using **Python data pipelines, pandas, scikit-learn**, and **SQL-based enrichment workflows** to identify phishing, brand abuse, and digital identity crime; deployed **real-time anomaly detection** systems that prevented **\$2.3M** in fraudulent transactions across **190+ markets**.
- Designed and operated **agentic systems and autonomous protection workflows** leveraging **Claude API, prompt engineering, and LLM-driven threat enrichment**; orchestrated end-to-end AI-native investigative pipelines that converted raw cybercrime intelligence into **scalable, durable engineering solutions** with **92%** accuracy and **75%** time savings versus manual processes.
- Built **production REST APIs, microservices, and data pipelines in Java Spring Boot** that converted cybercrime research findings into actionable customer protections; integrated **cloud services (AWS EC2, Lambda, CloudWatch)** and **distributed systems** to deploy reliable, secure, and scalable prevention capabilities across high-volume transaction streams.
- Owned systems end-to-end—**design, build, test, deploy, monitor, and improve**—including **production incident response, operational discipline, and security hardening**; maintained **P1/P2 SLA compliance**, performed rapid triage of abuse-detection failures, and partnered with security, product, and engineering teams to ship protections with **minimal handoffs** and **zero regulatory breaches**.
- Applied **security research mindset** to analyze attacker behavior, phishing campaigns, and fraud tactics; translated threat intelligence into **durable engineering solutions, protection signals, and prevention workflows** that measurably reduced abuse prevalence and improved **time-to-detection by 65%**; collaborated with security operations and domain experts to move from cybercrime identification to shipped protection at speed.

SKILLS

Programming & Backend Systems – Python, Java, Spring Boot, REST APIs, microservices architecture, cloud-native design.

Data & AI Engineering – SQL (PostgreSQL, MySQL, Oracle), data pipelines, ETL, pandas, NumPy, scikit-learn, agentic systems, Claude API, prompt engineering, LLM-driven workflows, anomaly detection, real-time decisioning logic.

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, distributed systems, CI/CD (Jenkins), Git, Linux, shell scripting.

Security & Cybercrime Operations – phishing detection, brand abuse investigation, digital identity crime analysis, fraud prevention, threat enrichment, security research, abuse-prevention workflows, incident response, SLA management, regulatory compliance.

Data Visualization & Analytics – Power BI, Tableau, dashboards, operational reporting, DAX, data modelling, business intelligence.

Domain Expertise – payments processing, SWIFT messaging (MT/MX), ISO 20022 message flows, SEPA, financial services compliance, regulatory frameworks, change-control management, cross-functional collaboration.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin	02/2026
BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India	01/2021

PROJECTS

Cybercrime Detection & AI-Driven Investigation Platform (HCL Technologies)

- Architected and deployed an **agentic system and AI-enabled cybercrime detection platform** leveraging **Claude API, prompt engineering, and LLM-driven threat enrichment** to automate investigation and enrichment workflows; ingested malicious URLs, phishing campaigns, and brand-abuse signals via **Python data pipelines and real-time SQL queries** across distributed data sources.
- Built **production Python backend services and Java Spring Boot microservices** that converted raw threat intelligence into **scalable protection signals and decisioning logic**; integrated **AWS Lambda, CloudWatch monitoring, and distributed data orchestration** to deploy autonomous and semi-autonomous tooling that reduced manual investigation effort by **40%** and improved response accuracy to **94%**.
- Designed and operated **end-to-end agentic workflows** that moved from cybercrime discovery to shipped protection with **minimal handoffs**; maintained **production operational discipline**, rapid incident response for abuse-prevention systems, and security hardening across all deployed capabilities.

Ireland Jobs Tracker – Agentic Resume Automation & AI Workflow Orchestration (Personal Project)

- Engineered an **agentic system and AI-native automation platform** that integrated **Claude API (claude-haiku-4-5), prompt engineering, structured-JSON guardrails, and LLM-driven content generation** to produce job-description-tailored resumes at scale; orchestrated **end-to-end intelligent workflows**: Apify web scraping → JD ingestion → Claude-powered tailored content generation → reportlab PDF rendering → GitHub Actions CI/CD → Vercel deployment.
- Demonstrated **agentic systems design, AI capability architecture, and prompt engineering mastery**; applied constraint-based LLM prompting and AI workflow orchestration to build **autonomous, production-grade AI tooling** that delivered measurable user value and showcased hands-on expertise in **AI-native systems, LLM integration, and intelligent automation** directly aligned with cybercrime-operations agentic requirements.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
