PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and developed **full-stack applications** using **Python** (backend) and **React.js** (frontend), delivering 8+ microservices for enterprise clients; implemented **REST APIs** and **microservices** to support agent communications and data exchange across interconnected banking and ERP systems, reducing API latency by **35%**.
- Built real-time monitoring dashboards using **Power BI** and **CloudWatch** for agent performance tracking, logging, and operational alerting; implemented **real-time features** for SLA management and incident visibility, enabling P1/P2 response within **15 minutes** for production environments.
- Developed and maintained **CI/CD pipelines** using **Jenkins** and **Git** in **agile delivery** environments; troubleshooted and resolved technical issues across the full stack (backend, frontend, database, cloud infrastructure), achieving **99.8% uptime** on critical payment-processing and ERP-integrated applications.
- Engineered **Python** backend services and **SQL** data pipelines (**PostgreSQL**, **MySQL**, **Oracle**) for real-time data exchange; deployed containerized applications using **Docker** on **AWS (EC2, S3, Lambda)**, processing **2M+ transactions daily** with zero data loss.
- Collaborated with product managers, designers, business analysts, and cross-functional teams across geographies to deliver enterprise-grade production implementations; wrote clean, maintainable, and efficient code adhering to security and data protection standards, completing **40+ feature releases** in agile sprints with **95% code review approval rate**.
- Applied knowledge of algorithms, design patterns, computer science fundamentals, and data structures to optimize application performance; leveraged **AI/ML libraries** and data analytics skills (**scikit-learn**, **pandas**) to enhance system intelligence; explored and integrated **AI tools** to improve innovation and quality across the SDLC.

SKILLS

Full-Stack Development – Python, React.js, REST APIs, microservices, Flask, FastAPI, Java Spring Boot.

Frontend & UI – React.js, Angular, responsive design, real-time dashboards, component architecture.

Backend & Databases – Python, Java Spring Boot, PostgreSQL, MySQL, Oracle, SQL optimization, schema design.

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, CI/CD (Jenkins, Git), agile delivery, Linux.

Data & Analytics – Power BI, Tableau, data modelling, data warehousing, ETL pipelines, DAX, Power Query, pandas, NumPy, scikit-learn.

AI/ML & Monitoring – AI/ML libraries, real-time monitoring, Splunk, Dynatrace, performance tracking, logging.

Domain & Enterprise Systems – Banking & financial services, SWIFT messaging (MT/MX), ISO 20022, SEPA, payments processing, ERP integration, change management, GDPR compliance.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

PROJECTS

AI Agent Monitoring & Performance Platform (HCL Technologies)

- Architected and deployed a full-stack **AI agent monitoring platform** using **Python** (FastAPI backend), **React.js** (frontend), and **PostgreSQL** (data persistence); integrated **real-time WebSocket communication** for live agent status updates, reducing visibility latency from **5 minutes to <2 seconds**.
- Developed **microservices APIs** for agent lifecycle management, resource allocation, and performance tracking; containerized services using **Docker** and deployed on **AWS ECS** with auto-scaling; handled **10K+ concurrent agent connections** with **99.95% availability**.
- Implemented **real-time logging and alerting dashboards** in **Power BI** connected to **CloudWatch metrics**; engineered **Python ETL pipelines** to aggregate agent performance data across **12 regions**, enabling stakeholders to identify bottlenecks and optimize resource utilization by **28%**.
- Established **CI/CD pipelines** using **Jenkins** and **Git** for automated testing and deployment; followed agile SDLC best practices with two-week sprints, delivering **15+ features** over 6 months; integrated **AI/ML libraries** (scikit-learn) for predictive agent health scoring with **92% accuracy**.
- Collaborated with product managers and cross-functional engineering teams to gather requirements, validate UAT scenarios, and troubleshoot production issues; wrote **clean, secure, maintainable code** adhering to data protection standards and design patterns for scalability.

SWIFT Payments Dashboard & ISO 20022 Modernization (HCL Technologies)

- Engineered real-time **payments operations dashboard** using **Python** backend services and **React.js** frontend; integrated **SWIFT message parsing** (MT/MX formats) with **ISO 20022** data mapping to provide transaction-flow visibility and regulatory compliance reporting for a tier-1 banking client.
- Deployed **microservices APIs** supporting SEPA, cross-border, and instant payment flows; optimized **SQL queries** (Oracle, PostgreSQL) for reconciliation workflows, reducing settlement report generation time by **45%** and improving audit trail completeness to **100%**.
- Supported production operations through **Splunk and CloudWatch monitoring**, **SLA management**, and P1/P2 incident response; leveraged **Python scripting** to automate daily reconciliation checks and compliance validations for GDPR and PSD2 regulatory requirements, eliminating **12 manual hours per week**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
