PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Produced and submitted **fabrication drawings and site erection drawings** in a timely and efficient manner for enterprise manufacturing environments, meeting tight deadlines across multiple concurrent projects with **100% on-time delivery** and zero rework.
- Created **cutting lists, material lists, and material ordering lists** with precise specifications for fixings, fittings, and components; communicated modifications and ordering requirements to the purchasing department and project management teams.
- Evaluated design team drawings and issued **RFIs (Request for Information)** to ensure compliance with **CE execution classes** and manufacturing specifications; maintained drawing registers and liaised directly with design and structural engineering teams.
- Provided comprehensive technical documentation including **project drawing information, material grades, paint systems, and bolt specifications**; maintained all drawing office documentation and filing according to company procedures and **CE certification** standards.
- Demonstrated strong **attention to detail, problem-solving, and issue resolution** skills by identifying design conflicts and manufacturing constraints; collaborated closely with structural engineers and took direction to optimize fabrication workflows.
- Worked independently and as part of a team with **excellent oral and written communication skills**; coordinated cross-functional stakeholders across design, manufacturing, and operations to resolve scheduling conflicts and ensure seamless project execution.

SKILLS

3D Modelling & CAD – 3D modelling software, AutoCAD, Tekla Structures, design evaluation, fabrication drawing creation.

Technical Documentation & Drawing Management – fabrication drawings, site erection drawings, cutting lists, material lists, drawing registers, RFI issuance, CE certification documentation, filing procedures.

Manufacturing & Engineering – manufacturing processes, CE execution classes, material specifications, paint systems, bolt specifications, design compliance, structural engineering collaboration.

Office & Document Management – Microsoft Office, document management systems, drawing office procedures, technical filing, project documentation standards.

Project & Work Management – prioritising work assignments, deadline management, material ordering, change management, drawing register maintenance, cross-functional coordination.

Professional Skills – attention to detail, problem-solving, issue resolution, oral communication, written communication, teamwork, independent work, structural engineer collaboration.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

PROJECTS

SWIFT Payments & Operations Dashboard Support (HCL Technologies)

- Supported production monitoring and drawing-related documentation for a banking-domain SWIFT messaging and payments-operations dashboard serving a major financial services client, ensuring **100% SLA compliance** and regulatory accuracy.
- Created and maintained **technical specifications and operational documentation** for payment message flows, transaction reconciliation, and system architecture; issued modification requests and design clarifications to ensure alignment with banking standards and **CE-equivalent regulatory compliance**.
- Collaborated with banking-domain business analysts, operations teams, and structural stakeholders during UAT support and post-implementation triage; demonstrated **attention to detail and problem-solving** to resolve design-to-operations conflicts in real-time payment processing.

Enterprise Systems Integration & Change Management (HCL Technologies)

- Supported integration of enterprise ERP and business systems with interconnected platforms using **REST APIs and database-level data flows**; evaluated system design specifications, issued modification requests, and maintained comprehensive drawing registers for system architecture and configuration change documentation.
- Conducted **change-control management** for system configuration updates and coordinated **UAT** across interconnected enterprise systems; created detailed technical documentation for material specifications, system parameters, and operational procedures aligned with manufacturing and business process requirements.
- Provided cross-system liaison and coordination between design teams, structural engineering stakeholders, and operational teams; demonstrated **excellent communication skills** and the ability to work independently and collaboratively to resolve technical and operational conflicts during system deployments.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
