PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and implemented **scalable, event-driven architecture** components for real-time risk and trading systems at HCL Technologies, processing **10,000+ daily trading events** with **99.9% uptime SLA** using **Java Spring Boot, REST APIs**, and **AWS Lambda** for asynchronous event handling.
- Analyzed and addressed complex performance bottlenecks in multifaceted financial systems by profiling application behavior with **Dynatrace** and **CloudWatch**, reducing P1 incident response time by **35%** and improving system scalability for peak trading volumes.
- Wrote efficient, modular, and testable code adhering to quality standards, implementing **comprehensive unit and integration tests** using **JUnit** and **Spring Test**, conducting **peer code reviews** in **Git** workflows, and elevating code quality across **Jenkins CI/CD pipelines**.
- Supported the full product lifecycle from concept through development, deployment, and post-launch monitoring, collaborating with Product, Quant, and cross-functional Engineering teams to deliver stable and reliable applications aligned with business objectives in high-stakes trading environments.
- Engineered automated **Python data pipelines** and **ETL workflows** for real-time trade reporting and risk analytics dashboards using **pandas**, **NumPy**, and **SQL** (PostgreSQL, Oracle), enabling Quant teams to make data-driven trading decisions with **sub-second latency**.
- Collaborated seamlessly across Product, Quantitative Analysis, and Engineering teams to translate complex trading domain requirements into technical specifications, ensuring timely delivery through effective communication, issue escalation, and knowledge-sharing in Agile/Scrum ceremonies.

SKILLS

Languages & Frameworks – Java, Spring Boot, Python, SQL, REST APIs, Flask, FastAPI.

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux, Git, Jenkins CI/CD.

Data Engineering & Analytics – ETL pipelines, data modelling, Power BI, Tableau, pandas, NumPy, scikit-learn, data warehousing.

Databases – PostgreSQL, MySQL, Oracle, schema design, ad-hoc query optimization.

Monitoring & Observability – Splunk, Dynatrace, CloudWatch, application performance analysis, SLA management.

Trading & Financial Systems – event-driven architecture, real-time decision-making systems, risk analytics, trading domain knowledge, high-performance scalable systems.

Collaboration & Process – Agile/Scrum, Jira, Confluence, code reviews, peer collaboration, cross-functional teamwork.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

Real-Time Trading Risk & Analytics Dashboard (HCL Technologies)

- Architected and deployed a **scalable, event-driven** real-time risk monitoring system for trading operations, integrating **REST APIs** with multiple backend services to aggregate **trade flows, market risk metrics**, and **position analytics**.
- Developed **Python ETL pipelines** using **pandas** and **NumPy** to transform raw trade data into curated datasets, enabling **Power BI dashboards** that delivered real-time visibility into portfolio risk, trade volumes, and P&L; to Quant and Trading teams.
- Implemented **comprehensive monitoring** using **Dynatrace** and **CloudWatch**, establishing alerting rules for latency thresholds and system health, reducing mean-time-to-resolution (MTTR) for trading system incidents by **40%** and maintaining **99.95% uptime** during high-volume trading periods.
- Collaborated with Quant and Product teams to gather trading domain requirements, translate them into technical specifications, and deliver features through **Jenkins-orchestrated CI/CD pipelines**, ensuring stable and reliable application support throughout the product lifecycle.

AI-Powered Resume Automation & Workflow Orchestration (Personal Project – Ireland Jobs Tracker)

- Engineered a full-stack **AI workflow automation** system integrating the **Claude API (Anthropic)** with advanced **prompt engineering** and **constraint-guardrail design** to generate job-description-tailored resumes at scale using **claude-haiku-4-5** and **structured JSON prompting**.
- Orchestrated end-to-end data pipeline: **Apify scrapers** → job description ingestion → **Claude AI processing** → **reportlab PDF generation**, deployed to production via **GitHub Actions CI/CD** and **Vercel**, demonstrating proficiency in **real-time event-driven systems** and **scalable system architecture**.
- Applied software engineering best practices including **modular code design**, **testable architecture**, **Git version control**, and **API integration patterns**, showcasing ability to design and implement scalable, secure systems that handle complex data transformations and real-time processing.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
