PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Administered and supported **IBM WebMethods integration platform** components including **Integration Server, Deployer, and API Gateway** across non-production and production environments, ensuring stable platform operations and **99.5% uptime SLA** compliance for enterprise banking clients.
- Built and maintained **CI/CD pipelines** using **Jenkins** for automated build, test, and release processes; integrated **Git** branching strategies and code-review workflows to streamline deployment cycles and reduce release-to-production time by **40%**.
- Managed **release and environment configuration** across multiple environments (dev, test, UAT, production); performed change-control coordination, configuration validation, and post-deployment troubleshooting for **20+ monthly releases** in a regulated banking environment.
- Deployed and orchestrated **containerised applications using Docker and Kubernetes**; implemented infrastructure automation and cluster management to support consistent, repeatable deployments across Linux (RHEL) and Windows environments.
- Provided operational platform support including **performance monitoring via Dynatrace and CloudWatch**, system patching, security hardening, access-control management, **root cause analysis** of production incidents, and **P1/P2 incident response** with cross-functional incident triage.
- Developed **Python automation scripts** and **Bash shell scripts** for operational tasks including environment provisioning, log analysis, scheduled reporting, and continuous improvement of release processes; implemented **Infrastructure as Code** principles to reduce manual configuration overhead by **35%**.

SKILLS

DevOps & Release Management – IBM WebMethods (Integration Server, Deployer, API Gateway), CI/CD pipelines, Jenkins, release orchestration, environment configuration, change management, deployment automation.

Cloud & Containerisation – Docker, Kubernetes, AWS (EC2, S3, Lambda, CloudWatch), Azure, Infrastructure as Code, cluster management.

Scripting & Automation – Python, Bash, shell scripting, cron jobs, Ansible, automation-focused operational improvements.

Version Control & Collaboration – Git, Bitbucket, Jira, Confluence, cross-functional team coordination with development, QA, operations, and architecture teams.

Monitoring, Logging & Troubleshooting – Dynatrace, Splunk, CloudWatch, performance tuning, incident analysis, root cause analysis, system troubleshooting.

Platform & Systems Administration – Linux (RHEL), Windows administration, Java Spring Boot, REST APIs, SOAP services, messaging concepts, API Gateway management.

Domain & Compliance – Banking and financial services, regulated environment governance, GDPR compliance, SWIFT messaging (MT/MX), ISO 20022 message flows, SLA management.

EDUCATION AND TRAINING

PROJECTS

Enterprise Banking Payments Platform – Release & Environment Management (HCL Technologies)

- Managed **IBM WebMethods integration platform** supporting SWIFT MT/MX message processing and payments-operations dashboards for a major banking client; administered **Integration Server, Deployer, and API Gateway** across non-production and production landscapes.
- Designed and maintained **CI/CD pipelines using Jenkins** for automated builds, functional testing, and controlled deployments; integrated **Git** version control with structured branching and code-review gates to ensure release quality and compliance in a regulated banking environment.
- Orchestrated **release and environment configuration** management across dev, test, UAT, and production; coordinated change-control procedures, UAT support, and post-go-live operational triage with development, QA, and banking-domain operations teams.
- Implemented **monitoring via Dynatrace and CloudWatch** for real-time system performance visibility; performed **root cause analysis** on production incidents and delivered **P1/P2 incident response** to maintain **99.5% SLA compliance** for critical payment flows.
- Authored **Python and Bash automation scripts** for environment provisioning, log analysis, and operational reporting; reduced manual operational overhead by **35%** through continuous improvement of release processes and system administration tasks.

Enterprise ERP Integration & Change Management (HCL Technologies)

- Supported **enterprise business systems integration** connecting ERP modules with banking applications; managed cross-system data flows via **REST APIs** and database-level integrations across **PostgreSQL, Oracle, and MySQL**.
- Coordinated **change-control management** and configuration updates for interconnected business systems; performed UAT coordination and post-implementation support across multiple system landscapes in a governed, regulated banking environment.
- Deployed and managed containerised ERP-adjacent services using **Docker**; implemented **CI/CD automation via Jenkins** to streamline system configuration updates and reduce deployment risk in complex enterprise environments.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
