PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Researched, tested, and implemented **AI tools and automation solutions** across enterprise systems at HCL Technologies, identifying business problems and building practical workflows for office, operations, and customer service teams; documented processes and trained staff on new AI-assisted systems.
- Developed **Claude API integrations** and **prompt engineering** workflows in the Ireland Jobs Tracker project, orchestrating end-to-end AI automation pipelines with structured-JSON constraints, enabling tailored content generation at scale and demonstrating hands-on **AI workflow automation** capability.
- Built and improved **AI knowledge bases** and customer-facing automation solutions using **REST APIs, Python, and system integrations**; connected spreadsheets, documents, forms, and reporting tools via **API-driven automation** to reduce manual admin by **40%** across cross-functional teams.
- Supported **AI voice agent and customer service automation** projects by creating **prompts, workflows, templates and process documents**; monitored **AI outputs for accuracy, quality and usefulness** and ensured **practical, safe, secure, and appropriate** business use of AI systems.
- Reviewed existing manual processes and identified **automation opportunities** across enterprise business systems including **CRM, spreadsheets, documents, forms and reporting tools**; tested new tools before rollout and documented results clearly for stakeholder review.
- Designed **Power BI dashboards, DAX measures, and data models** for operational reporting and decision-making support; built **ETL pipelines** using **Python, Power Query, and SQL** to connect systems and improve reporting accuracy for management and departmental teams.

SKILLS

AI & Automation Tools – Claude API, prompt engineering, ChatGPT, AI workflow automation, AI agents, chatbots, Make, Zapier, Power Automate, n8n.

Software Development & APIs – Python, JavaScript, Java Spring Boot, REST APIs, system integrations, API development, GitHub Actions, FastAPI, Flask.

Business Systems & Automation – CRM systems, workflow automation, Salesforce, phone system integrations, Aircall, spreadsheets, documents, forms, process automation.

Data Analysis & Reporting – Power BI, Tableau, DAX, Power Query, ETL, SQL (PostgreSQL, MySQL, Oracle), data modelling, data warehousing, Python (pandas, NumPy, scikit-learn).

Enterprise Systems & Operations – ERP integration, change-control management, system configuration, UAT coordination, post-go-live support, operations monitoring.

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, Linux, shell scripting, CI/CD pipelines.

Communication & Documentation – process documentation, user guides, training materials, stakeholder communication, attention to detail, independent project management.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

PROJECTS

Ireland Jobs Tracker – AI Workflow Automation Platform

- Architected and deployed an end-to-end **AI automation workflow** integrating **Claude API (Anthropic)** with **prompt engineering** for dynamic, JD-tailored content generation; implemented structured-JSON constraint guardrails to ensure output quality and safety.
- Orchestrated multi-stage **system automation** using **Apify scrapers for data ingestion** → **Claude API processing** → **reportlab PDF generation** → **GitHub Actions CI/CD** → **Vercel deployment**, demonstrating ability to connect and automate across disparate tools and platforms.
- Developed **prompts, workflows, and templates** for AI-assisted resume customization at scale; tested and monitored **AI outputs for accuracy and usefulness**, ensuring practical, secure, and appropriate automation for end-users.

SWIFT Payments Operations & AI Automation Dashboard (HCL Technologies)

- Researched and tested **AI tools** to automate payment operations workflows; built **AI-assisted automation solutions** for transaction monitoring, alerting, and reporting across **SWIFT messaging (MT/MX)**, **ISO 20022 message flows**, and **SEPA payment processing**.
- Designed and deployed **Power BI dashboards and operational reporting** for **payments operations teams**, integrating **Splunk and Dynatrace monitoring data** into **automated alerts and decision-support reports**; documented processes and trained banking-domain teams on new AI-assisted monitoring workflows.
- Identified **automation opportunities** in manual payment reconciliation and compliance workflows; created **Python automation scripts and SQL data pipelines** to reduce manual admin in cross-border payment processing and regulatory reporting, improving SLA compliance by **35%**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
