PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Led infrastructure modernization assessments for enterprise banking clients, evaluating legacy application environments across on-premise, virtualization, and containerization platforms; architected and recommended GCP migration strategies (Compute Engine, Cloud SQL, Kubernetes Engine) resulting in **40% reduction** in operational overhead and improved system reliability.
- Demonstrated and prototyped **GCP product integrations** (BigQuery, Pub/Sub, Cloud Functions, Cloud Run) in customer and partner environments; delivered **15+ enterprise infrastructure briefings** and proof-of-concept implementations supporting bid responses and technical relationship building with Fortune 500 banking clients.
- Identified and qualified **technical objections** across distributed systems architecture, application modernization, and cloud infrastructure; developed resolution strategies and **prioritization roadmaps** for legacy-to-cloud migrations, partnering with product management to accelerate customer adoption of GCP solutions.
- Architected enterprise application infrastructure and integration strategies leveraging **GCP IaaS, PaaS, and SaaS solutions**; guided customers through assessment of WAN/internet architectures and provided recommendations for multi-cloud and hybrid-cloud platforms supporting **ISO 20022, SEPA, and cross-border payment flows**.
- Translated complex technical requirements into actionable modernization strategies; collaborated cross-functionally with customer technical teams, enterprise architects, and Google Cloud sales to resolve infrastructure blockers and shape technology adoption roadmaps across **data warehousing, distributed systems, and cloud productivity suites**.
- Developed technical thought leadership through **enterprise infrastructure presentations** on cloud-native application development, containerization strategies, data and AI solutions architecture, and relational/NoSQL database platforms; mentored customers on Kubernetes, Docker, and microservices design patterns on GCP.

SKILLS

Cloud Infrastructure & Platforms – Google Cloud Platform (Compute Engine, Cloud SQL, Kubernetes Engine, Pub/Sub, Cloud Functions, Cloud Run, BigQuery), AWS (EC2, S3, Lambda, CloudWatch), on-premise infrastructure engineering, virtualization, containerization.

Enterprise Architecture & Systems – distributed systems design, application infrastructure, WAN/internet architectures, cloud-native architecture, hybrid-cloud and multi-cloud platforms, enterprise integration patterns, ERP systems integration.

Data & AI Solutions – BigQuery, Cloud Dataflow, data warehousing design, ETL pipelines, NoSQL databases, relational databases (PostgreSQL, MySQL, Oracle), Apache Spark, data modelling, machine learning on GCP.

Infrastructure & DevOps Technologies – Docker, Kubernetes, CI/CD (Jenkins, GitHub Actions), Infrastructure-as-Code concepts, containerization platforms, Linux system administration, shell scripting.

Application Development & Integration – Java Spring Boot, REST API architecture, Python (data pipelines, automation scripting), microservices design, system integrations, cross-system data flows, change-control management.

Domain Expertise & Standards – Banking and financial services, payments processing (ISO 20022, SEPA, cross-border payments, SWIFT MT/MX), regulatory compliance (GDPR, audit trails), SLA management,

production support, incident response.

Technical Presentations & Communication – enterprise infrastructure briefings, solution architecture presentations, business case development, technical stakeholder engagement, cross-functional collaboration, UAT coordination.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin	02/2026
BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India	01/2021

PROJECTS

Enterprise Banking Dashboard & Infrastructure Modernization (HCL Technologies)

- Developed and deployed a **SWIFT messaging and payments-operations dashboard** leveraging **cloud infrastructure monitoring tools** (Dynatrace, CloudWatch) to provide real-time transaction-flow visibility, operational alerting, and SLA management for production payment-processing systems supporting **ISO 20022, SEPA, and cross-border payment flows**.
- Architected infrastructure assessment and modernization strategy, evaluating legacy application environments and recommending **GCP-based solutions** (BigQuery for reconciliation analytics, Cloud SQL for transactional systems, Pub/Sub for event streaming) to reduce operational overhead by **35%** while maintaining regulatory compliance and audit trails.
- Conducted **enterprise infrastructure briefings** and technical assessments with banking customer stakeholders; identified and resolved technical objections related to cloud migration, data security, and distributed-system architecture; delivered **proof-of-concept implementations** demonstrating integration of legacy ERP systems with GCP platforms.

Cloud-Native Application Architecture & Integration Framework (HCL Technologies)

- Designed and documented **enterprise application infrastructure patterns** for modernizing legacy business systems; architected integration strategies leveraging **REST APIs, cloud-native databases, and containerization** to support seamless data flows across distributed systems and on-premise ERP platforms.
- Built automated **CI/CD pipelines using Jenkins and Git** to orchestrate infrastructure deployments across **Docker containers and Kubernetes clusters**; implemented infrastructure-as-code principles and change-control management processes, reducing deployment time by **45%** and improving system reliability.
- Delivered **technical presentations** on cloud infrastructure modernization, distributed systems architecture, and application development technologies to enterprise customers; mentored cross-functional teams (business analysts, operations, developers) on WAN architectures, microservices design, and PaaS/IaaS solution selection criteria.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
