PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Owned rapid-response incident management for mission-critical financial exchange workloads, resolving critical issues and SLO violations through **troubleshooting, debugging, and system administration** across **Java, Python, and distributed systems** running on **AWS (EC2, S3, Lambda, CloudWatch)**; achieved **99.5%+ uptime** through proactive monitoring with **Splunk, Dynatrace, and CloudWatch**.
- Demonstrated expertise in financial exchange operations and ultra-low-latency systems (ULLS) by supporting a **SWIFT messaging dashboard** serving payment-critical infrastructure; managed **ISO 20022 message flows, SEPA, cross-border payments, and PSD2 compliance** while maintaining strict **SLA adherence, audit trails, and regulatory compliance (GDPR / Data Protection)** for banking clients.
- Troubleshot packet-level network latency, packet loss, and traffic path anomalies using **tcpdump, Wireshark, mtr, and traceroute** tools; debugged **distributed system interactions, REST API performance, and database query optimization** across **PostgreSQL, MySQL, and Oracle** to resolve critical customer performance issues.
- Authored technical content for technical audiences including **incident playbooks, troubleshooting guides, runbooks, and architecture documentation** for production-support teams; created **Confluence documentation, developer guides, and operational procedures** for mission-critical systems supporting financial exchange operators and cross-functional incident-response teams.
- Demonstrated crisis response and escalation management across multiple teams by leading P1/P2 incident triage, coordinating rapid mitigation with banking-domain business analysts and operations teams, and influencing incident-response momentum for critical customer issues impacting financial transactions and regulatory compliance.
- Built end-to-end AI workflow automation using **Claude API (Anthropic), prompt engineering, and JSON-structured constraints** to generate tailored technical content at scale; orchestrated **GitHub Actions CI/CD pipelines, Vercel deployment, and API integrations** demonstrating hands-on expertise in coding, scripting, and DevOps tooling for complex distributed workflows.

SKILLS

Programming & Debugging – Java, Python, C, C++, Go, Shell scripting, REST API development, code debugging, system administration.

Network Troubleshooting & Analysis – tcpdump, Wireshark, mtr, traceroute, packet capture, packet analysis, artificial packet creation, load testing, traffic path analysis, network latency diagnostics, ultra-low-latency systems (ULLS).

Cloud Infrastructure & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux, Jenkins, Git, CI/CD pipelines, infrastructure monitoring, deployment automation, GitHub Actions.

Databases & Data Engineering – SQL, PostgreSQL, MySQL, Oracle, schema management, data validation, ETL pipelines, data warehousing, query optimization.

Financial Services & Payments Domain – Financial exchange operations, SWIFT messaging (MT/MX formats), ISO 20022 message flows, SEPA, cross-border payments, PSD2, Open Banking, payments processing, tokenization, reconciliation workflows, regulatory compliance (GDPR, Data Protection), SLA management.

Incident Management & Observability – Production support, P1/P2 incident response, crisis response, escalation management, Splunk, Dynatrace, monitoring dashboards, alerting, change-control management, UAT coordination.

Technical Communication & Documentation – Incident playbooks, troubleshooting guides, runbooks, architecture documentation, developer guides, Confluence, technical content for technical audiences, onboarding materials.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin	02/2026
--	----------------

BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India	01/2021
---	----------------

PROJECTS

Mission-Critical SWIFT Payments Operations Dashboard (HCL Technologies)

- Provided 24/7 production support and rapid incident response for a **SWIFT messaging dashboard** supporting a Tier-1 banking client's payment-critical infrastructure; maintained **strict SLA adherence** through real-time monitoring of **MT/MX message flows, transaction visibility, and operational alerting**.
- Resolved critical issues impacting financial exchange operations by **troubleshooting distributed system interactions, debugging Java Spring Boot services, and analyzing packet-level traffic** using **tcpdump and Wireshark** to identify latency and packet loss in ultra-low-latency payment environments.
- Authored operational playbooks, runbooks, and troubleshooting guides documenting **SWIFT message processing flows, error-handling procedures, and escalation pathways** for production-support teams and banking-domain stakeholders; coordinated cross-functional incident response with business analysts and regulatory compliance teams.

AI-Powered Technical Content Generation System (Ireland Jobs Tracker)

- Built a full-stack **Python and Claude API (Anthropic)** integration orchestrating end-to-end workflow automation: **Apify web scrapers → structured JSON prompt engineering → claude-haiku-4-5 LLM inference → reportlab PDF generation → GitHub Actions CI/CD → Vercel deployment**.
- Engineered advanced **prompt-engineering constraints and structured outputs** to generate tailored technical content at scale; demonstrated hands-on expertise in **API integration, system design, and DevOps automation** for complex distributed workflows.
- Deployed CI/CD automation using **GitHub Actions and Vercel**, enabling automated testing, content validation, and production deployment; showcased proficiency in **coding, scripting, system integration, and infrastructure-as-code** principles applicable to mission-critical systems.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
