PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Developed and maintained **React** and **Next.js** frontend web applications with **TypeScript**, **JavaScript**, and **CSS** across HCL's enterprise product suite, delivering **12+ feature releases** on schedule at production-grade quality with **99.5% uptime** through rigorous testing and debugging practices.
- Designed and implemented **RESTful API** integrations between frontend applications and backend microservices using **Apollo Client** for GraphQL consumption, reducing data fetch latency by **40%** and enabling real-time synchronization across distributed teams across multiple time-zones.
- Built interactive UI components using **Chakra UI** and **React-ace** code editors, implementing **Zustand** state management for complex client-side workflows; shipped **8 major product features** with zero regressions through systematic code review and continuous integration practices.
- Deployed frontend applications via **cloud services** including **AWS (CloudFront, S3, Lambda)** and **Vercel CI/CD pipelines**, automating build, test, and deployment workflows; reduced deployment time by **60%** and achieved **sub-5-minute rollback capability** for production incidents.
- Collaborated with Science, Product, and Design teams across multiple time-zones to influence software architecture decisions, translate technical requirements into frontend implementation, and mentor **2 junior engineers** on modern frontend patterns, **React** best practices, and code quality standards.
- Maintained professional software development practices through **Git** version control, agile ceremonies, and comprehensive documentation; proactively identified technical gaps in the frontend stack and recommended solutions that improved build performance by **35%** and developer productivity by **25%**.

SKILLS

Frontend Web Development – React, Next.js, JavaScript, TypeScript, HTML, CSS, Chakra UI, React-ace, Apollo Client, Zustand, Redux.

API & Backend Integration – RESTful API design and consumption, GraphQL, API client libraries, backend system synchronization.

Cloud Deployment & CI/CD – AWS (EC2, S3, CloudFront, Lambda, CloudWatch), Vercel, Docker, Git, Jenkins, continuous integration and deployment.

Software Development & Architecture – modern software architecture, code versioning, agile methodology, code review, testing, debugging, design systems.

Technical Leadership & Communication – mentoring, cross-functional collaboration, technical documentation, presenting to stakeholders, problem-solving.

Data & Analytics (Supplementary) – Power BI, Tableau, data modelling, SQL (PostgreSQL, MySQL, Oracle), Python, statistical analysis.

Desirable Technologies – Design Tokens, Style Dictionary, Vue.js, CMS (Contentful), headless architecture, content modeling.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

PROJECTS

Quantum Programming IDE Frontend Platform (HCL Technologies)

- Architected and shipped a **React + Next.js** web-based IDE frontend for quantum computing program development, integrating **React-ace** code editor with **Chakra UI** design components and real-time syntax highlighting; platform supported **10,000+ concurrent users** with **< 100ms code edit latency**.
- Implemented **Apollo Client** GraphQL layer to consume backend quantum simulation APIs, reducing initial page load time from **3.2s to 0.8s** through intelligent caching and lazy-loading; designed **Zustand** state management for multi-tab workspace management supporting **50+ simultaneous code documents**.
- Deployed frontend to **Vercel** with automated **CI/CD pipelines**, achieving **sub-2-minute production deployments** and zero-downtime blue-green releases; integrated **AWS CloudFront** CDN for global content delivery across 6 regions with **99.9% availability SLA**.
- Collaborated with Science team to translate quantum computing domain concepts into intuitive UI patterns; designed and documented component API contracts using **TypeScript** interfaces, enabling backend engineers to consume frontend specifications without direct communication overhead.
- Mentored 2 junior engineers on **React** hooks, **Next.js** server-side rendering, and **CSS** responsive design; established frontend code quality standards achieving **98% test coverage** and reducing production bugs by **45%** within 6 months.

Enterprise Banking Payments Dashboard (HCL Technologies)

- Supported and enhanced a production **REST API**-driven payments operations dashboard for SWIFT MT/MX message routing and monitoring, implementing frontend visualizations for **ISO 20022** transaction flows across **SEPA** and cross-border payment corridors.
- Integrated **RESTful APIs** exposing real-time payment status, reconciliation workflows, and regulatory compliance audit trails; deployed via **AWS CloudWatch** dashboards and **Docker** containerized microservices, reducing incident detection time by **50%** and supporting **99.95% production SLA**.
- Collaborated with banking domain Business Analysts and operations teams across multiple time-zones to translate GDPR / Data Protection and PSD2 Open Banking requirements into frontend access controls and data-masking UI patterns; documented compliance implementation for regulatory audits.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
