PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Engineered **Claude API integrations** and **prompt engineering workflows** for large-scale AI-driven automation, designing structured JSON constraints and multi-turn conversation orchestration to generate contextually tailored outputs at production scale.
- Built end-to-end **AI workflow automation pipelines** integrating **Claude Haiku** with data ingestion, content generation, and scheduled deployment via **GitHub Actions** and **Vercel**, reducing manual processing time by **80%**.
- Developed **Python-based AI applications** leveraging **Anthropic SDK**, **FastAPI**, and **prompt engineering best practices** for dynamic content generation, fine-tuned model selection, and real-time API response handling across distributed systems.
- Implemented **data pipeline orchestration** using **Python**, **pandas**, and **ETL automation** to process unstructured inputs, validate outputs against business rules, and integrate with downstream **REST APIs** and cloud storage (**S3**) for seamless AI workflow execution.
- Collaborated on enterprise **Java/Spring Boot backend services** and **REST API development**, applying software engineering discipline to maintain code quality, implement **CI/CD pipelines** via **Jenkins**, and ensure production reliability through **CloudWatch** and **Dynatrace monitoring**.
- Demonstrated strong **full-stack web development** capabilities across **Python**, **React**, and **cloud deployment (Vercel)**, with hands-on experience in **API integration**, **GitHub** version control, and **Docker containerisation** for reproducible AI application environments.

SKILLS

AI & Large Language Models – Claude API, Anthropic SDK, prompt engineering, structured outputs, JSON constraints, multi-turn conversations, model selection, temperature tuning.

Programming & Backend Development – Python, Java, Spring Boot, FastAPI, Flask, REST APIs, system integrations, microservices architecture.

Data Engineering & Automation – Python, pandas, NumPy, ETL pipelines, data validation, workflow orchestration, shell scripting, cron automation.

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Git, GitHub Actions, Jenkins CI/CD, Linux, containerisation.

Databases & Data Management – PostgreSQL, MySQL, Oracle, SQL query optimisation, data modelling, schema design.

Full-Stack Web Development – React, Angular, Vercel deployment, frontend-backend integration, responsive UI design.

Monitoring & Observability – Splunk, Dynatrace, CloudWatch, application performance monitoring, incident response, SLA management.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

PROJECTS

Ireland Jobs Tracker – AI-Driven Resume Generation Engine (Personal Project)

- Architected a production-scale **Claude API** integration using **claude-haiku-4-5** to generate job-description-tailored resumes through advanced **prompt engineering** with structured JSON schemas and constraint guardrails, processing **50+ job descriptions** with **92% content relevance accuracy**.
- Orchestrated end-to-end **AI workflow automation** pipeline: **Apify web scrapers** → job description ingestion → **Anthropic SDK** prompt execution → **reportlab PDF generation** → **GitHub Actions** CI/CD → **Vercel** production deployment, reducing manual resume creation from **2 hours to 5 minutes per JD**.
- Implemented **Python**-based data validation and output refinement, integrating **pandas** for JD field extraction, **FastAPI** backend endpoints for real-time resume generation requests, and **S3** artifact storage for scalable, auditable AI output management.

Enterprise Payments & SWIFT Operations Dashboard (HCL Technologies)

- Engineered production monitoring and alerting infrastructure for a mission-critical **SWIFT messaging** and **payments operations dashboard** supporting **ISO 20022 message flows**, **SEPA** cross-border transactions, and **PSD2 Open Banking** integrations for a Tier-1 banking client, achieving **99.95% uptime SLA**.
- Developed **SQL queries (PostgreSQL, Oracle)** for transaction reconciliation, payment-flow visibility, and regulatory audit-trail reporting; implemented **Python ETL scripts** for automated payment-status aggregation and exception alerting, processing **10,000+ daily transactions** with **zero data-loss incidents**.
- Supported **production incidents** and **P1/P2 issue triage** using **Splunk** and **Dynatrace** observability platforms; collaborated with banking domain **business analysts**, compliance teams, and operations staff on **GDPR** data-handling validation, **change-control management**, and **UAT coordination** for regulatory-compliant system updates.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
