PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and implemented **enterprise-level security solutions** across **AWS cloud environments** (EC2, S3, Lambda, CloudWatch) for production banking systems, ensuring compliance with regulatory frameworks and reducing security vulnerabilities by **40%** through continuous protocol evolution and control effectiveness assessments.
- Developed secure, high-quality production code in **Python** and **Java Spring Boot** with advanced code review practices; conducted **vulnerability assessments, penetration testing, and threat modelling** on multiple organizational assets including external applications interfacing with enterprise networks, identifying and remediating critical security gaps.
- Architected **cloud-native applications** leveraging **AWS services** including **Redshift, Lake Formation**, and **Infrastructure as Code** solutions (**Terraform, CloudFormation**); implemented **Data Security Posture Management (DSPM)** controls across data analytics pipelines, reducing exposure risk by **35%**.
- Executed **cybersecurity foundational concepts** including **IAM, Authentication, OIDC, SAML** across enterprise environments; designed tamper-proof, audit-defensible authentication and authorization mechanisms for production banking systems handling high-value transactions and regulatory-sensitive operations.
- Collaborated with stakeholders and business leaders to understand security requirements, conducted threat discovery scenarios, and recommended business-critical modifications during vulnerability windows; communicated complex security architectures to non-technical executives with **95%** stakeholder approval on remediation strategies.
- Leveraged **Python data analytics** capabilities (**pandas, NumPy, scikit-learn**) and **Snowflake** data platform integration to build security dashboards and threat intelligence pipelines; applied **AI/ML** techniques for anomaly detection in security event streams, reducing false positives by **50%**.

SKILLS

Cloud & Infrastructure Security – AWS (EC2, S3, Lambda, CloudWatch, Redshift, Lake Formation), Terraform, CloudFormation, Infrastructure as Code, cloud-native application architecture, security solution design.

Cybersecurity & Access Control – IAM, Authentication, Authorization, OIDC, SAML, identity and access management, vulnerability assessment, penetration testing, threat modelling, tamper-proof design, audit-defensible controls.

Secure Software Development – Python, Java Spring Boot, REST API security, code review practices, SDLC security integration, secure coding standards, vulnerability remediation.

Data Security & Analytics – Snowflake, Redshift, Lake Formation, Data Security Posture Management (DSPM), Databricks, data warehousing, Python (pandas, NumPy, scikit-learn), SQL, ETL pipeline security.

Production Support & Monitoring – Splunk, Dynatrace, CloudWatch, incident management, SLA management, security event monitoring, threat intelligence dashboards, operational alerting.

Enterprise & Regulatory Compliance – GDPR, Data Protection, ISO 20022, SEPA, PSD2, payments processing security, regulatory audit trails, change-control management, financial-services compliance.

AI/ML & Emerging Trends – Machine learning security applications, anomaly detection, AI/ML field knowledge, AI workflow orchestration, Claude API, prompt engineering.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin	02/2026
BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India	01/2021

PROJECTS

Cloud-Native Security Architecture & Data Analytics Pipeline (HCL Technologies)

- Designed and deployed a **cloud-native security solution** integrating **AWS services (EC2, S3, Lambda, Redshift, Lake Formation)** with **Infrastructure as Code (Terraform, CloudFormation)** to monitor and secure enterprise payment systems handling **ISO 20022** and **SEPA** transactions.
- Implemented **IAM, OIDC, SAML** authentication and authorization controls across multiple systems; conducted **threat modelling, vulnerability assessments, and penetration testing** on external-facing banking applications, identifying **12 critical vulnerabilities** and achieving **100%** remediation before go-live.
- Built **Data Security Posture Management (DSPM)** dashboards using **Snowflake** and **Python (pandas, NumPy)** to audit data access patterns, encryption status, and regulatory compliance (GDPR, PSD2); reduced unauthorized data exposure incidents by **55%**.

Ireland Jobs Tracker – AI-Driven Security & Automation (Personal Project)

- Orchestrated **end-to-end AI workflow automation** using **Claude API (Anthropic)** with advanced **prompt engineering** and structured-JSON constraint guardrails to generate security-policy-compliant, role-tailored job application content at scale.
- Integrated **Python**-based ETL pipeline (Apify scrapers → Claude API → reportlab PDF generation) with **GitHub Actions CI/CD** and **Vercel** cloud deployment, demonstrating proficiency in secure automation, **cloud deployment**, and **AI/ML orchestration** for enterprise-grade workflows.
- Applied **AI/ML field knowledge** to design constraint-based prompts and validation logic, ensuring output security and compliance; built tamper-proof process controls with audit trails for tracking AI-generated content—directly relevant to **creative security solutions** and **automated threat detection** mechanisms.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
