PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and developed **Java 11 Spring Boot microservices** with **REST APIs** for enterprise trade and payments processing platforms, delivering **15+ production-grade services** across globally distributed teams while maintaining **99.95% uptime SLA** through robust error handling and circuit breaker patterns.
- Architected and executed **AWS cloud-native migration** strategy leveraging **EC2, S3, Lambda, and CloudWatch** to replace legacy monolithic systems with containerized microservices on **Docker**, reducing infrastructure costs by **40%** and enabling horizontal scaling for peak trading volumes.
- Built event-driven applications using **Kafka and Java Messaging System (JMS)** for asynchronous transaction processing in investment banking domain, processing **50K+ daily trade messages** with guaranteed delivery semantics and sub-100ms latency through optimized partition strategies.
- Implemented **CI/CD pipelines using Jenkins** with automated testing, security scanning, and blue-green deployment strategies across **Git** repositories, reducing deployment cycle time from **4 hours to 45 minutes** and enabling continuous delivery of regulatory-compliant financial systems.
- Performed advanced **performance tuning and optimization** of large-scale applications handling **ISO 20022 message flows** and cross-border payment processing, identifying **database query bottlenecks** using **Oracle and PostgreSQL** analysis and achieving **3x throughput improvement** while reducing P99 latency by **60%**.
- Delivered **system design artifacts and architecture documentation** for complex microservices applications across trading platforms, ensuring compliance with **regulatory and security requirements** in financial services; collaborated with senior architects and business stakeholders to translate domain requirements into scalable, maintainable technical solutions.

SKILLS

Core Programming & Backend – Java 11, Spring Boot, REST APIs, microservices architecture, application design, code reviews, production code quality, synchronous system algorithms.

Data & Databases – Oracle, PostgreSQL, MongoDB, SQL optimization, query performance tuning, relational database design, data modeling.

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker containerization, CI/CD pipelines, Jenkins, Git, application resiliency, DevOps practices.

Event-Driven & Messaging – Kafka, Java Messaging System (JMS), event-driven development, asynchronous processing, message brokers.

Financial Services Domain – Investment banking systems, trade processing platforms, ISO 20022 message flows, SEPA/cross-border payments, PSD2 awareness, regulatory compliance, GDPR, audit trails, SLA management, incident response.

Data Analysis & Insights – Large dataset analysis and visualization, pattern identification, system architecture improvement, operational analytics, reporting.

Agile & Collaboration – Agile methodologies, Jira, Confluence, cross-functional team delivery, stakeholder communication, global team coordination.

EDUCATION AND TRAINING

PROJECTS

Trade Processing Platform Migration to Event-Driven Microservices Architecture (HCL Technologies)

- Led design and implementation of **12 Java 11 Spring Boot microservices** replacing a monolithic trade-order management system, using **Kafka for event-driven asynchronous processing** of trade confirmations, settlement instructions, and regulatory reporting flows across investment banking operations.
- Architected **AWS cloud-native infrastructure** on EC2 with auto-scaling, S3 for trade data lakes, and **Lambda for serverless regulatory report generation**, migrating **500GB+ of historical trade data** while maintaining **zero-downtime cutover** and enabling **2x concurrent user capacity**.
- Optimized **Oracle and PostgreSQL database queries** handling **100K daily trade transactions**, identifying and eliminating **N+1 query patterns** and leveraging **materialized views for ISO 20022 compliance reporting**, achieving **75% reduction in query execution time** and sub-50ms API response latency.
- Implemented comprehensive **CI/CD pipeline automation using Jenkins** with **Docker image building, automated security scanning, and blue-green deployments**, enabling **50+ production releases per sprint** while maintaining strict regulatory audit trails and change-control governance.
- Developed **CloudWatch dashboards and operational monitoring** for real-time trade flow visibility, SLA tracking, and incident alerting; built **automated remediation workflows** to address **recurring connectivity issues between trade-processing and settlement systems**, reducing manual incident response by **85%**.

Payments Operations Dashboard & SWIFT Message Processing Pipeline (HCL Technologies)

- Built production-grade **payments operations dashboard** for banking client providing real-time visibility into **SWIFT MT/MX message flows, ISO 20022 transaction processing, and cross-border payment routing**, supporting **50K+ daily payment messages** with strict **GDPR, PSD2, and regulatory compliance** controls.
- Engineered **Python ETL data pipelines** ingesting SWIFT payment messages into **PostgreSQL warehouses**, transforming raw MT/MX message formats into structured ISO 20022 datasets for SEPA instant payment and cross-border corridor analysis, enabling **sub-2 minute data freshness** for operations teams.
- Implemented **Splunk and Dynatrace monitoring** for **P1/P2 incident management** across payment processing services, establishing **SLA dashboards, automated alerting, and root-cause analysis workflows** that reduced mean-time-to-resolution (MTTR) for payment failures by **70%** and improved on-time delivery to **99.98%**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
