PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and developed **Java Spring Boot** microservices and **REST APIs** for secure, high-quality internal applications supporting enterprise workflows; architected complex application layers ensuring code met design standards and stability requirements across **large corporate environments**.
- Built and deployed **cloud services on AWS (EC2, S3, Lambda, CloudWatch)** in production; implemented **CI/CD pipelines** via **Jenkins** and **Git** to automate recurring deployment issues, reducing manual intervention by **40%** and improving software stability.
- Analyzed existing enterprise application codebases to enhance functionality and build new services; refactored legacy **Java** systems and designed **database schemas** across **PostgreSQL, MySQL, Oracle** to improve system performance by **35%** and maintainability.
- Transformed operational data into actionable insights through **Power BI** dashboards and **data visualization** tools; developed **Python ETL pipelines** and **SQL queries** for real-time reporting that enhanced decision-making for senior leadership and operations teams.
- Collaborated in **agile environments** and **Scrum ceremonies** across cross-functional teams; integrated **AI models** and **Claude API** into application workflows to automate complex business logic; demonstrated expertise in **prompt engineering** and **AI integration** for solving enterprise problems.
- Supported banking and financial-services applications in **large corporate environments** with **application resiliency** and **security** best practices; managed system stability, reliability, and compliance across interconnected enterprise systems serving mission-critical operations.

SKILLS

Programming Languages & Frameworks – Java, Spring Boot, Spring Framework, Python, SQL, REST API Development.

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, CI/CD Pipelines, Jenkins, Git, GitHub Actions, DevOps Principles.

Databases & Data Engineering – PostgreSQL, MySQL, Oracle, System Design, Database Schema Design, ETL Development, Data Modeling.

Data Analytics & Visualization – Power BI, Tableau, DAX, Power Query, Python Data Stack (pandas, NumPy, scikit-learn), Data Visualization.

Enterprise & Architecture – Enterprise Application Development, Large Corporate Environments, Architecture Design, Application Resiliency, Security Best Practices, Software Development Life Cycle.

AI & Emerging Technologies – AI Model Integration, Claude API, Prompt Engineering, LLM Orchestration, Anthropic SDK, AI-Driven Automation.

Agile & Collaboration – Agile Methodologies, Scrum, Jira, Confluence, Cross-Functional Collaboration, Code Reviews.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

PROJECTS

Internal Board Meeting Application – Secure, Scalable Product Development (HCL Technologies)

- Architected and developed a **Java Spring Boot** backend service for internal applications empowering senior bank leaders to prepare and run board meetings efficiently; implemented **REST APIs** with **secure, high-quality code** ensuring system stability and synchronization across **Microsoft 365 apps** integration.
- Designed and deployed **AWS cloud services (EC2, S3, Lambda)** to support scalable product delivery; implemented **CI/CD pipelines** via **Jenkins** to automate testing and deployment, reducing release cycles by **45%** and improving application reliability.
- Built **Power BI dashboards** and **data visualization** components to transform operational data into actionable insights for executive stakeholders; engineered **Python ETL pipelines** and **SQL queries** across **PostgreSQL and Oracle** to support real-time reporting and board-meeting analytics.
- Integrated **AI models** and **Claude API** into application code to automate recurring business logic and enhance product features; demonstrated **prompt engineering** expertise and **AI integration** skills to deliver intelligent, innovative solutions within the product.

Enterprise Payments & Financial Systems Integration (HCL Technologies)

- Engineered and maintained production **Java** and **.NET** applications for a global banking client; implemented **application resiliency, security best practices, and large corporate environment** compliance standards including regulatory frameworks and audit-trail requirements.
- Designed **REST API integrations** and interconnected systems across **PostgreSQL, MySQL, Oracle** databases to support payments processing, **ISO 20022 message flows**, and **SEPA** operations; analyzed existing enterprise codebases and architected new service layers to enhance functionality and system performance.
- Automated recurring operational issues using **Python scripting, shell scripts, and Linux** administration; deployed monitoring and alerting via **Splunk, CloudWatch, Dynatrace** to improve software stability and reduce mean-time-to-resolution by **50%** in production environments.
- Collaborated in **agile teams** and cross-functional environments with business analysts and operations teams; participated in **Scrum ceremonies**, code reviews, and **Software Development Life Cycle** governance to deliver secure, stable, and scalable banking-domain solutions.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
