PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Developed and maintained **Java Spring Boot** microservices and REST APIs in production, implementing feature work, bug fixes, and architectural enhancements for enterprise financial applications serving **10M+ daily transactions**.
- Designed and built **modular, reusable Android components** and **SDK frameworks** using **Java** patterns, reducing code duplication across mobile platforms by **40%** and accelerating feature delivery cycles.
- Architected **Android applications** with **Kotlin and Java**, implementing comprehensive **unit and instrumentation tests** achieving **85%+ code coverage** and ensuring production reliability across secure, scalable mobile solutions.
- Participated in architectural decisions for enterprise systems integrations using **REST APIs** and **database-level data flows** across **PostgreSQL, Oracle, MySQL**, supporting cross-functional collaboration with product managers and engineering teams.
- Leveraged **AI-assisted development tools** and **GitHub Copilot** for code acceleration and design optimization, reducing development cycle time by **30%** while maintaining code quality and test coverage standards.
- Delivered production support and incident response for mission-critical financial services applications using **Splunk, CloudWatch, Dynatrace** monitoring, maintaining **99.95% SLA compliance** across payments processing platforms handling SWIFT messaging and ISO 20022 flows.

SKILLS

Android Development – Android SDK, Android APIs, Kotlin, Java, modular component design, SDK framework development.

Mobile Architecture & Patterns – Android application architecture, reusable components, architectural decision-making, design patterns.

Backend & API Development – Java Spring Boot, REST API design, microservices, enterprise application development.

Testing & Quality Assurance – unit testing, instrumentation testing, test automation, code coverage optimization.

AI-Assisted Development – GitHub Copilot, AI-assisted code generation, prompt engineering, development acceleration tools.

Monitoring & Reliability – Splunk, Dynatrace, CloudWatch, SLA management, incident response, production support.

DevOps & Infrastructure – Docker, Jenkins CI/CD pipelines, Git version control, AWS (EC2, S3, Lambda), Linux systems.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

PROJECTS

SWIFT Payments & Financial Operations Android Dashboard (HCL Technologies)

- Architected and developed native **Android application** with **Kotlin and Java** to provide real-time visibility into SWIFT messaging flows, ISO 20022 message processing, and cross-border payment operations for a Tier-1 banking client.
- Designed **modular, reusable Android SDK components** for payments data rendering, transaction reconciliation workflows, and regulatory compliance alerting, enabling rapid feature deployment across multiple banking platforms.
- Implemented comprehensive **unit and instrumentation tests** across all **Android APIs and framework layers**, achieving **88% code coverage** and ensuring compliance with financial-services audit and data-protection standards (GDPR, PSD2).
- Collaborated with product managers, mobile engineering teams, and banking-domain operations stakeholders to define application architecture, participate in architectural decisions, and deliver secure, scalable mobile solutions supporting **5M+ daily payment messages**.

Enterprise Mobile SDK Framework & AI-Assisted Development Acceleration (HCL Technologies)

- Built reusable **Android SDK framework** and **modular components** using **Java** and **Kotlin** for enterprise financial integrations, supporting **REST API consumption**, database connectivity across **PostgreSQL, Oracle, MySQL**, and cross-functional system integration patterns.
- Integrated **GitHub Copilot** and **AI-assisted development tools** into development workflows, reducing Android component development time by **32%** while maintaining architectural standards and **code review quality** across mobile engineering teams.
- Designed **modular, reusable Android components** for payments operations dashboards with **instrumentation tests** and performance optimization, reducing app load time by **28%** and improving user experience for banking operations staff managing SLA-critical transaction workflows.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
