PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and delivered **full-stack Java Spring Boot microservices** serving **10M+ daily transactions** in a large corporate banking environment; architected **REST APIs** with **authentication/authorization patterns**, input validation, and secure coding practices achieving **99.95% uptime** across production deployments.
- Executed **system design** and **application development** for enterprise HR and payments-operations platforms, building **responsive user experiences** with **React (JavaScript/TypeScript)** frontend and **reliable backend integrations** across distributed microservices handling cross-border payment flows and employee data workflows.
- Owned **operational stability** and **application resiliency** for production-grade systems; implemented **observability tooling** via **Splunk, Dynatrace, and CloudWatch** to proactively identify hidden problems and patterns in system behavior, reducing incident response time by **40%** through automated alerting and correlation analysis.
- Built and maintained **full-stack capabilities** spanning **database querying (SQL)** across PostgreSQL, MySQL, and Oracle; designed normalized schemas and optimized **queries for large-scale data sets**, enabling **real-time reporting dashboards** and improving query performance by **35%** for regulatory compliance and operational analytics.
- Drove **application development** and **testing** practices within **CI/CD pipelines (Jenkins, Git)** and **Agile/Scrum** ceremonies; containerized services using **Docker** and deployed to **AWS (EC2, S3, Lambda, CloudWatch)**, managing change-control workflows for **software development life cycle (SDLC)** compliance in a secure, regulated corporate environment.
- Contributed to **software engineering communities of practice** by developing advanced **prompt engineering** and **LLM integration** patterns; synthesized requirements from stakeholders across banking operations, HR, and technology teams to drive continuous improvement of coding hygiene, system architecture, and API design standards.

SKILLS

Backend & Full-Stack Development – Java, Spring Boot, REST API development, microservices architecture, system design, application development.

Frontend Development – React, JavaScript, TypeScript, component design, state management, responsive user experiences.

Database & Data Engineering – SQL, PostgreSQL, MySQL, Oracle, database querying, schema design, data modeling, large-scale data set analysis.

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, containerization, cloud-native patterns, application deployment and troubleshooting.

DevOps & SDLC – CI/CD (Jenkins, Git), Agile/Scrum, change-control management, application monitoring, security practices, authentication/authorization patterns, secure coding.

Observability & Reliability – Splunk, Dynatrace, CloudWatch, operational stability, application resiliency, incident management, system reliability patterns.

Financial Services & Compliance – Banking domain, payments processing, SWIFT messaging (MT/MX), ISO 20022, SEPA, cross-border payments, regulatory compliance, GDPR, distributed systems.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin

02/2026

BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India

01/2021

PROJECTS

Enterprise Payments Operations Dashboard (HCL Technologies)

- Architected and deployed a **full-stack microservices platform** for SWIFT messaging and payments-operations visibility, integrating **React** frontend with **Java Spring Boot** backend services consuming **REST APIs** across interconnected banking systems; achieved **real-time transaction-flow visibility** and operational alerting for **ISO 20022 message flows** and **SEPA/cross-border payment** workflows.
- Implemented **observability and monitoring** using **Splunk, Dynatrace, and CloudWatch** to track payment message throughput, latency, and compliance metrics; designed **database schemas (PostgreSQL, Oracle)** and optimized **SQL queries** for **large-scale regulatory reporting** and reconciliation workflows, ensuring audit trails and data accuracy for **GDPR** and financial regulatory requirements.
- Managed **CI/CD pipelines (Jenkins, Git)**, containerization with **Docker**, and deployment to **AWS (EC2, S3)**; coordinated cross-functional UAT, change-control governance, and post-go-live support across distributed systems, ensuring **application resiliency** and **99.95% SLA** compliance for mission-critical payments processing.

Ireland Jobs Tracker – AI-Powered Resume Generation (Personal Project)

- Engineered an end-to-end **full-stack application** orchestrating **LLM integration** via **Claude API (Anthropic)** to generate job-description-tailored resumes at scale; implemented **prompt engineering** with structured JSON constraints and guardrails, reducing manual resume customization by **85%**.
- Built automated data pipeline leveraging **Apify scrapers** for JD ingestion, **Claude-haiku-4-5** for intelligent content generation, and **reportlab** for PDF synthesis; designed **REST API** backend for orchestration and integrated with **GitHub Actions** CI and **Vercel** deployment for continuous delivery.
- Demonstrated hands-on expertise in **system design, API development, microservices orchestration**, and **cloud deployment** patterns applicable to enterprise software engineering; showcased ability to break down complex technical problems and build scalable, production-grade solutions.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
