PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and implemented **Java Spring Boot microservices** for enterprise payment processing systems, achieving **99.95% uptime SLA** through proactive monitoring with **Splunk, CloudWatch, and Dynatrace**; managed **P1/P2 incident response** and post-mortem analysis for critical financial transaction flows.
- Architected and deployed **CI/CD pipelines using Jenkins and Git** with automated testing and code review gates, reducing deployment failures by **40%** and enabling **20+ daily production releases** across interconnected banking systems.
- Built backend **REST APIs** and system integrations using **Java Spring Boot** to support **ISO 20022 message flows, SEPA payments, and cross-border payment processing** with **PostgreSQL, MySQL, and Oracle**; ensured regulatory compliance, audit trails, and GDPR data protection across all integrations.
- Optimized application reliability through **Linux shell scripting, log analysis, and AWS infrastructure management (EC2, S3, Lambda, CloudWatch)**; automated **200+ recurring operational tasks** using **Python** and cron jobs, reducing manual SRE overhead by **35%**.
- Containerized legacy enterprise applications using **Docker** and deployed to **AWS**, improving environment consistency and enabling **blue-green deployments**; supported change-control processes for ERP configuration updates and cross-system data synchronization across production.
- Conducted root-cause analysis and performance tuning on **Java/.NET applications** through **Dynatrace APM, CloudWatch metrics, and database query optimization in PostgreSQL and Oracle**; delivered **15+ reliability improvements** that reduced transaction latency by **30%** and increased throughput by **25%**.

SKILLS

Languages & Runtimes – Java, Python, SQL, Bash/Shell, R.

Backend Frameworks & APIs – Spring Boot, REST APIs, FastAPI, Flask.

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux, Git.

Observability & Incident Management – Splunk, Dynatrace, CloudWatch, application performance monitoring, SLA management, incident response.

Databases & Data Engineering – PostgreSQL, MySQL, Oracle, SQL optimization, ETL, data pipelines, pandas, NumPy.

CI/CD & Automation – Jenkins, GitHub Actions, automated testing, deployment pipelines, change-control management.

Payments & Financial Systems – SWIFT messaging (MT/MX), ISO 20022 message flows, SEPA payments, cross-border payments, PSD2 Open Banking, payments processing, regulatory compliance, GDPR.

EDUCATION AND TRAINING

**MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin**

02/2026

**BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India**

01/2021

PROJECTS

SWIFT Payments Operations & Monitoring Dashboard (HCL Technologies)

- Developed and maintained production **Java Spring Boot microservices** powering a real-time payments operations dashboard for a tier-1 banking client; processed **10,000+ daily SWIFT message transactions** (MT/MX formats) with **99.95% reliability SLA**.
- Implemented comprehensive observability using **Splunk and CloudWatch** to monitor payment message flows, transaction reconciliation, and operational alerting; created **custom dashboards** tracking **ISO 20022 compliance metrics, SEPA settlement times, and cross-border payment latency**.
- Engineered backend **REST APIs** and **PostgreSQL/Oracle database integrations** to enable real-time payment status visibility and transaction-flow traceability; coordinated **UAT support and post-go-live incident management** with banking operations and compliance teams.
- Automated **payment reconciliation workflows** and regulatory audit-trail generation using **Python ETL scripts**; ensured **GDPR compliance and data protection controls** across all payment data handling, reducing manual audit overhead by **45%**.

Ireland Jobs Tracker – LLM-Driven Resume Automation (Personal Project)

- Architected end-to-end **AI automation workflow** leveraging **Claude API (Anthropic)** and **prompt engineering** to generate job-description-tailored resumes at scale; integrated **Apify scrapers, JSON payload orchestration, structured data validation, and constraint guardrails**.
- Built backend service using **Python** with **FastAPI** to ingest job descriptions, invoke **Claude-haiku-4-5** with sophisticated prompt templates, and generate **reportlab PDF outputs**; achieved **sub-2-second API response times** under concurrent load.
- Deployed **CI/CD pipeline using GitHub Actions** for automated testing and continuous deployment to **Vercel**; implemented **error handling, logging, and monitoring** across the entire LLM workflow to ensure **99.8% resume generation success rate**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
