PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Oversaw construction and design compliance across enterprise infrastructure projects by conducting comprehensive site visits, quality assessments, and design specification reviews; coordinated CSA technical compliance on complex multi-disciplinary builds involving Electrical and Mechanical interfaces using **change-control management** and **RACI matrices**.
- Managed project scope-of-works (SoW), task information deliverables lists (TIDP), and responsibility matrices for CSA disciplines across **3+ concurrent projects**; liaised with engineers, construction managers, subcontractors, quantity surveyors, and clients to develop comprehensive project plans and ensure on-schedule delivery.
- Developed design delivery schedules and managed deliverables and approvals processes for design packages in alignment with consultant resources and procurement requirements; conducted **RFI and ACC information control** workflows and escalated design-related risks to planning, commercial, and management with mitigation strategies.
- Assessed material choices for project requirements, budget compliance, and QEHS standards; reviewed design proposals for suitability and constructability; prepared comprehensive handover packs to site teams and coordinated CSA discipline interfaces with cross-functional consultants and vendors.
- Supported UAT coordination and post-go-live triage across interconnected engineering and business systems; maintained accurate records of design activities, changes, and issues using **Jira, Confluence**, and project management tools; assisted with new tender and PCSA (pre-construction services agreements) deliverables.
- Conducted design programme reviews to ensure alignment between consultant resource capacity and construction/procurement schedules; collaborated with Central Engineering teams on design issues, changes, and research initiatives; contributed to value engineering (VE) proposals and off-site manufacturing (OSM) opportunities for added value delivery.

SKILLS

Project Management & Planning – Scope-of-works (SoW), TIDP (task information deliverables lists), RACI matrices, design delivery schedules, RFI workflows, ACC information control, change-control management, UAT coordination, PCSA deliverables.

Construction & Technical Engineering – CSA technical compliance, design specification review, constructability assessment, material selection, QEHS standards, handover documentation, value engineering (VE), off-site manufacturing (OSM), site quality assurance.

Team & Stakeholder Management – Cross-functional collaboration with engineers, construction managers, subcontractors, quantity surveyors, consultants, clients, vendors, insurance companies, regulatory bodies.

Design & Systems Coordination – Multi-disciplinary interface coordination (Electrical, Mechanical, CSA), design risk identification and mitigation, design proposal evaluation, information flow standards, consultant resource planning.

Tools & Systems – Jira, Confluence, project management platforms, design documentation systems, information control workflows.

Domain Knowledge – Enterprise Data Centres, Advanced Technology & Life Sciences, Hyperscale Data Centres, Fire Protection, complex engineering projects, procurement workflows, regulatory compliance.

Core Competencies – Project planning, risk management, schedule management, quality assurance, stakeholder communication, design coordination, constructability review, regulatory alignment.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of Ireland, Dublin	02/2026
BACHELOR OF ENGINEERING in Computer Science – SNS College of Technology, Coimbatore, India	01/2021

PROJECTS

Enterprise Infrastructure Design Coordination & Compliance (HCL Technologies)

- Led CSA technical compliance and design coordination across a **multi-million-pound enterprise data centre construction project** involving **15+ stakeholders** (engineers, construction managers, subcontractors, consultants, vendors); developed comprehensive scope-of-works (SoW), TIDP, and RACI responsibility matrices to ensure clarity across all teams.
- Managed design delivery schedules in alignment with consultant resource capacity and procurement timelines; conducted **20+ design programme reviews** and design package approvals to ensure full approval for procurement; maintained accurate design change records and escalated **12 design-related risks** to management with mitigation strategies.
- Reviewed design proposals for suitability and constructability; assessed material choices against project requirements, budget constraints, and QEHS standards; prepared **5 comprehensive handover packs** to site teams; coordinated CSA discipline interfaces with Electrical and Mechanical teams, reducing design conflicts by **35%**.

Advanced Technology Facility Project Handover & Site Support (HCL Technologies)

- Conducted post-go-live site visits and quality assessments on an advanced technology and life sciences facility project; reported construction progress, design compliance, and quality of work to Central Engineering and project management; identified and documented **8 design-to-build discrepancies** and coordinated remediation with subcontractors.
- Managed RFI (Request for Information) workflows and ACC information control standards; assisted with UAT coordination and change-control management across interconnected project systems; maintained Jira and Confluence records of design activities, issues, and decisions for audit trail and stakeholder transparency.
- Collaborated with clients, insurance companies, and regulatory bodies on compliance and approval processes; assisted with new tender and PCSA deliverables; proposed **3 value engineering (VE) and off-site manufacturing (OSM) initiatives** that reduced construction time by **15%** and material costs by **12%**.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
