PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER – HCL Technologies | Chennai, India

09/2021 – 01/2025 (3.5 Years)

- Designed and shipped **RESTful APIs and microservice components** using **Java Spring Boot** and **TypeScript/Node.js**, delivering feature parity across 15+ interconnected banking services; implemented **HTTP, SOAP, and MVC** patterns with emphasis on **scalability, reliability, and performance** in production environments serving 2M+ daily transactions.
- Architected and deployed **cloud-native services on AWS (EC2, S3, Lambda, CloudWatch)** with **Docker containerization** and **CI/CD pipelines via Jenkins**; designed systems with **long-term support, testability, and maintainability** for mission-critical payment-operations infrastructure supporting **SLA compliance and zero-downtime deployments**.
- Built **libraries and SDKs** using **C#, Java, and TypeScript** for cross-platform integration with enterprise business systems and ERP modules; collaborated with **program managers, designers, and partner teams** to define architecture, API contracts, and deployment strategies across interconnected systems.
- Owned end-to-end feature delivery including **design, architecture, implementation, testing, debugging, and shipping** of **AI-infrastructure-enabled reporting and monitoring dashboards** using **Power BI, Tableau, and DAX**; delivered quantitative and qualitative performance metrics that reduced incident-response latency by **40%** across production systems.
- Mentored and coached 5+ junior engineers on best practices in **system design, code quality, performance optimization, and secure production operations**; shared insights across teams on **scalability patterns, reliability engineering, and AI-driven observability** to improve development velocity and system durability.
- Implemented **change-control management, UAT coordination, and post-go-live support** for complex multi-system integrations in regulated financial environments; ensured **secure long-term support, GDPR compliance, and audit-trail integrity** across payment-operations platforms processing **ISO 20022 message flows and SEPA instant-payment transactions**.

SKILLS

Languages & Frameworks – Java, Spring Boot, C#, TypeScript, Node.js, Python, C/C++, REST APIs, SOAP, HTTP, MVC.

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, CI/CD (Jenkins, Git), Linux, containerization.

Databases & Data Engineering – PostgreSQL, MySQL, Oracle, SQL, data modeling, data warehousing, ETL pipelines.

AI & Analytics Platforms – Power BI, Tableau, DAX, Power Query, R/RStudio, pandas, NumPy, scikit-learn, statistical analysis, machine learning.

Domain Expertise – Payments processing, SWIFT messaging (MT/MX), ISO 20022, SEPA, cross-border payments, PSD2, Open Banking, GDPR, ERP integration, change-control management, production incident management.

Methodologies & Tools – Splunk, Dynatrace, Jira, Confluence, Agile/Scrum, system design, observability, reliability engineering, mentorship.

Specializations – Microservices architecture, scalability, AI-infrastructure systems, security, long-term support, testability.

EDUCATION AND TRAINING

MASTER OF SCIENCE in Data Analytics – National College of
Ireland, Dublin

02/2026

BACHELOR OF ENGINEERING in Computer Science – SNS College
of Technology, Coimbatore, India

01/2021

PROJECTS

AI-Powered Payment Processing & Observability Platform (HCL Technologies)

- Architected and delivered a **full-stack, AI-enabled payment-operations platform** combining **Java Spring Boot backend services, TypeScript/Node.js microservices, C# SDKs, and PostgreSQL/Oracle data layers** to support real-time **ISO 20022 message processing, SEPA instant payments, and cross-border transaction flows**.
- Designed **RESTful APIs and SOAP integration points** enabling secure, long-term interoperability with 8+ enterprise business systems and ERP modules; implemented **MVC architecture and HTTP best practices** with **Docker containerization and AWS Lambda serverless components** for automated payment reconciliation and settlement workflows.
- Built **AI-driven monitoring and anomaly-detection dashboards** using **Power BI, Tableau, and DAX** integrated with **Splunk and Dynatrace** to provide real-time visibility into payment-message flows, transaction latency, and regulatory-compliance metrics; reduced incident-detection time by **35%** and improved SLA adherence to **99.95%**.
- Implemented **CI/CD pipeline automation via Jenkins** with **comprehensive test coverage (unit, integration, performance)** ensuring **code quality, reliability, and maintainability** across deployments; orchestrated **change-control management and UAT coordination** with program managers and business stakeholders, enabling zero-downtime releases across 12+ production regions.
- Delivered **GDPR-compliant audit-trail logging and secure long-term support mechanisms** for payment-transaction records, meeting regulated financial-services requirements; mentored 4 junior engineers on scalability patterns, performance optimization, and AI-infrastructure best practices, improving team delivery velocity by **28%**.

Multi-Platform Banking Dashboard SDK & Integration Library (HCL Technologies)

- Developed a **reusable SDK and component library** in **Java, C#, and TypeScript** abstracting complexity of **SWIFT messaging (MT/MX standards), ISO 20022 message flows, and SEPA payment processing**; enabled 6 downstream teams to integrate with payment-operations systems without rebuilding core logic, reducing development time by **45%**.
- Architected **REST API contracts and HTTP communication patterns** with comprehensive documentation and automated testing; collaborated with designers and program managers to finalize SDK interfaces and deployment strategies across web, mobile, and backend environments.
- Shipped **secure, scalable components** emphasizing **long-term support, testability, and maintainability**; implemented **performance monitoring via CloudWatch and Dynatrace**, ensuring **P99 latency under 200ms** for transaction-lookup queries serving 1M+ API calls daily.

ACHIEVEMENTS & CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California, Davis** (Coursera)

- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
